

Certified Organic Plant Nursery 2023 Edition

Leafy Greens

Arugula, Astro

CERTIFIED ORGANIC! Astro organic arugula seeds produce a plant with less lobed and more strap-like leaves. It has a milder flavour than regular arugula. Astro is perfect for baby greens in early spring and fall - even in winter, as it's very cold-hardy. Baby greens are ready to cut in only 21 days. Arugula is very well suited to micro-green growing. As micro-greens, it is delicious and tender, intensely flavoured, but delicate on the palate. With a nutty, spicy taste that is sometimes pungent or peppery, arugula perks up salads, sandwiches, and even pizza. It is very cold-hardy and has a milder flavour when grown in cool weather, and it is also high in Vitamin A and potassium.

Arugula, Astro Organic Matures in 30-40 days.

- ✓ Good cool weather growth
- ✓ Nice in containers

SKU: ARU-101 | **Seedlings:** \$4.75 (9 seedlings per pot)

Arugula, Bellezia

CERTIFIED ORGANIC! While technically this variety is a perennial, growers and home gardeners will probably prefer growing it as a fast-maturing annual crop. Bellezia Organic arugula features highly upright growth for dense planting and easy harvesting. The leaves are darker green than most, with good-looking serrated edges and mild flavour. Bellezia organic arugula is the perfect arugula for raw salads or salad mixes and makes excellent micro-greens. It is suitable for container growing throughout the year and features intermediate resistance to downy mildew.

Arugula, Bellezia Organic Matures in 51 days.

- ✓ Upright growth
- ✓ Dark green leaves

SKU: ARU-102 | **Seedlings:** \$4.75 (9 seedlings per pot)

Arugula, Rocket (Roquette)

CERTIFIED ORGANIC! A spicy, strong-tasting spinach-like salad green with a delicious nutty flavour. Very popular in salads or cooked like Spinach. Quick growth and cooler weather are best for this plant. Plants can grow to about a metre (3') tall.

Arugula, Rocket (Roquette) Organic Matures in 30 or 40 days.

- ✓ Quick growing
- ✓ Cool season crop
- ✓ Flowers are edible
- ✓ A member of the Brassica family and rich in folic acid, vitamin C and B-complex

SKU: ARU-103 | **Seedlings:** \$4.75 (9 seedlings per pot)

Baby Bok Choi

CERTIFIED ORGANIC!

Bok choy, pak choi or pok choi is a type of Chinese cabbage, used as food. Chinese varieties do not form heads and have green leaf blades with lighter bulbous bottoms instead, forming a cluster reminiscent of mustard greens.

Bok Choy or Pac Choi Organic Matures in 30 or 45 days.

SKU: BOC-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Bok Choy or Pac Choi

CERTIFIED ORGANIC!

Bok choy, pak choi or pok choi is a type of Chinese cabbage, used as food. Chinese varieties do not form heads and have green leaf blades with lighter bulbous bottoms instead, forming a cluster reminiscent of mustard greens.

Bok Choy or Pac Choi Organic Matures in 30 or 45 days.

SKU: BOC-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Broccoli, Calabrese

CERTIFIED ORGANIC! Dark green plants grow 45-75cm (18-30") tall with a variable bluish-green central head between 8-20cm (3-8") across.

Calabrese organic Broccoli has abundant side shoots that keep coming until frost. Sow Calabrese organic broccoli seeds in early March indoors, or in May and June for a fall harvest. This heirloom broccoli variety arrived in North America with Italian immigrants in the late 1880s, probably centuries old. What Calabrese lacks in terms of uniformity, it more than makes up for in rich flavour.

Broccoli, Calabrese Organic Matures in 60 days.

- ✓ Dark green 10cm (4") heads
- ✓ Great flavour and texture
- ✓ Developed in Italy hundreds of years ago
- ✓ Open-pollinated seeds

SKU: BRO-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Broccoli, Raab Rapini

Heirloom Broccoli Rapini is actually from the turnip family. They are green cruciferous vegetables with edible leaves, buds, and stems; they resemble Broccoli but do not form a large head. They are a mix between Broccoli and Spinach, boasting a sweet, nutty flavour. Broccoli rabe is an excellent source of vitamins A and C; it's also rich in potassium and magnesium. Rapini is known for its bitter taste and is particularly associated with Mediterranean cuisine. They are a traditional Italian vegetable with beautiful shoots and leaves that have recently become a popular culinary ingredient in North America. Prepare Broccoli rabe as a side dish to accompany meat-based entrees or served on sandwiches, pasta, or even pizza and burgers.

Broccoli, Raab Rapini Matures In 42 Days

- ✓ Open-pollinated variety

SKU: BRO-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cabbage, Caraflex

CERTIFIED ORGANIC! Caraflex Organic Cabbage seeds are summer harvest. Plant Caraflex cabbage more densely; it is small, very pointed, and highly uniform heads. Caraflex has tight wrapper leaves that protect the tender, crunchy, sweet interior from weather and pests. Very nice flavour for a summer harvest cabbage. Fresh, sweet, and tender cabbage leaves. These pointed cabbages tend to be milder and sweeter and have more tender leaves than round heads. Caraflex has excellent holding capability and firmness and produces 1.5-2 lb heads, storing for up to 8 weeks. Caraflex presents well as a baby cabbage and is the RHS Award of Garden Merit winner.

Cabbage, Caraflex Organic Matures in 50 to 65 days.

- ✓ Tender, crunchy, sweet interior
- ✓ Tight wrapper leaves
- ✓ This shape is popular in Europe

SKU: CAB-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cabbage, Napa Wong nga pak, Da bai cai

CERTIFIED ORGANIC! Napa cabbage is a type of Chinese cabbage originating near the Beijing region of China that is widely used in East Asian cuisine. Since the 20th century, it has also become a widespread crop in Europe, the Americas and Australia. Napa cabbage is a vegetable that is an excellent source of vitamins C and K that can be incorporated into a variety of main courses and side dishes.

Cabbage, Napa Organic Matures in 60 to 70 days.

SKU: CAB-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cabbage, Primero Hybrid

CERTIFIED ORGANIC! An early, compact cabbage with a deep ruby red colour that has a sweet taste and tender texture is perfect for a single meal. A very productive variety, great for tight space plantings with an average head weight of 2-3 pounds. Grow this tasty red cabbage in less space! It performs well in heat and resists splitting; the head will hold if harvest is delayed.

Cabbage, Primero Hybrid Matures in 72 days.

- ✓ Dark red
- ✓ Sweet flavour

SKU: CAB-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cabbage, Farao

CERTIFIED ORGANIC! Farao cabbage is a hybrid green cabbage of the ball head form, forming a tight head of dense leaves. The leaves are deep green, and the heads grow to about 3 or 4 pounds (1-2 kg.). In addition to the compact head, Farao produces a generous layer of looser, protective outer leaves. The flavour of Farao cabbage plants is mild and peppery. The leaves are thin and tender. Farao cabbage is excellent for stir fries but will hold up to pickling, sauerkraut, and roasting. You can even eat it raw and fresh if you would like.

Cabbage, Farao Matures in 63 days.

- ✓ Mild and peppery flavour

SKU: CAB-104 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cabbage, Tokyo Bekana

CERTIFIED ORGANIC! Tokyo Bekana is a loose-head Chinese cabbage from Japan. The light green leaves curl at the edges, delicate leaves similar to lettuce in texture. Although this heirloom variety can be grown to full size for cooking, the baby leaves are spectacularly raw and work particularly well in salad mixes. Its delicate leaves develop succulent white petioles at full size, making it suitable for bunching. Tokyo Bekana cabbage is slow to bolt in summer and is hardy enough to grow all winter if you provide some cover.

Cabbage, Tokyo Bekana Organic Matures in 40 days.

- ✓ Sweet flavour
- ✓ Does not bolt in summer

SKU: CAB-105 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cabbage, Winter King Savoy

CERTIFIED ORGANIC! Large, dark green heads have that classic savoy crinkled texture and sweeten up nicely after frost. Enjoy savoy cabbage stir-fried or braised in butter. The thicker outer leaves make great cabbage rolls. Winter King Savoy cabbage is a northern adapted savoy type, an excellent English heritage variety that fits right here in Ontario. Fully green and more savoyed, it is also a perfect companion to the other super winter-hardy cabbage.

Cabbage, Winter King Savoy Matures in 120-180 days.

- ✓ Cool-weather hardy
- ✓ Best after frost
- ✓ English heritage variety

SKU: CAB-106 | **Seedlings:** \$4.75 (4 seedlings per pot)

Callaloo, Red & Green, Chinese Spinach

CERTIFIED ORGANIC! Callaloo has been a staple food in Western Africa for thousands of years; it remains a common and favourite vegetable throughout the Caribbean. Callaloo can be grown quickly and harvested regularly. This mild-tasting, super nutritious leafy green brings exquisite colour to salads and plenty of chlorophyll to stews and soups. You can reap the Callaloo seeds as a protein-rich, gluten-free grain. Most growers obtain about six harvests per plant from Callaloo before it begins to flower and form seeds. Callaloo is hardy and can cope much better with heat and dry conditions than other leafy greens.

Callaloo, Red Organic Matures In 50 Days

- ✓ Heirloom
- ✓ Cope with extreme heat and drought

SKU: CALL-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Callaloo, Green

CERTIFIED ORGANIC! Callaloo is a fast-growing tall leafy green from the amaranth family. You can harvest the young tender leaves or the mature leaves/stems for cooking. It's an incredibly nutritious green that can also be juiced and added to your favourite green juice recipe. The flower buds and seeds can also be eaten. Callaloo, the dish, originates in West Africa. The plant was domesticated in Africa and is cherished in many parts of the Caribbean. It is rich in flavour and nutrition and an incredibly resilient, self-sufficient, and prolific crop, making it an ideal superfood.

Callaloo, Green Organic Matures In 30 Days

- ✓ Self-sufficient crop
- ✓ Wind pollinated.

SKU: CALL-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Callaloo, Red Amaranth

CERTIFIED ORGANIC! Amaranth is one of the world's superfoods, chalked full of minerals. Amaranth (Red Callaloo) is used in a dry form as a tea substitute, a healthy sautéed side dish or a high protein source in baking recipes or smoothies. Young shoots and leaves can be eaten raw in salads. Grows fast and up to 6 feet. Every part of the plant is edible—an excellent and versatile plant. See recipes in "**Lucinda's Authentic Jamaican Kitchen**" by Lucinda Scala Quinn (Wiley). Don't forget to dry the extra plants for a winter pick-me-up tea, add honey & lemon, and you're good to go.

Callaloo, Red Matures In 50 Days

- ✓ Not frost tolerant

SKU: CALL-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cauliflower, Snowball

CERTIFIED ORGANIC! Snowball organic cauliflower seeds produce a self-blanching heirloom for spring plantings. Early Snowball cauliflower grows excellent, uniform snowy white, solid heads 6-7" (15-18cm) across. Start the seeds inside early for a good harvest before the summer heat kicks in. Cauliflower is surprisingly easy to grow, but some tried, and accurate tips will help you succeed better.

Cauliflower, Snowball Organic Matures in 55 days.

- ✓ Fully domed curds
- ✓ Heirloom

SKU: CAU-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cauliflower, Cheddar Hybrid

CERTIFIED ORGANIC! Cheddar cauliflower produces deep orange smooth, domed heads with medium weight and firm curds. The hue comes from the extra beta-carotene naturally stored in its florets, giving this cauliflower 25 percent more vitamin A than the more common white variety. The plants are medium-sized with strong leaves and tolerate summer heat better than other orange varieties. Like other vegetables in the Brassica family, cheddar cauliflower comes into peak season during the fall, when the cool air lends a deep sweetness. It tastes slightly more sugary and creamier than the white variety.

Cauliflower, Cheddar Hybrid Matures in 80 Days

SKU: CAU-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Celery, Tango

CERTIFIED ORGANIC! Improved breeding makes Tango the celery of choice for many growing conditions; it excels in southern Canada and the northern US. Also, its stringless stalks have very little fibre but a high-water content and retain a remarkably refined taste. Tango organic celery leaves are intensely aromatic and valuable in soups and savoury dishes of all kinds. Tango matures a little earlier than others, and an expert recommends this for market growers and home gardeners. Plus, it's open-pollinated, so it's well-suited for seed saving—winner of the RHS Award of Garden Merit.

Celery, Tango Coated Organic Matures in 85 days.

- ✓ Remarkably refined taste
- ✓ Excels in southern Canada and Northern US

SKU: CEL-101 | **Seedlings:** \$4.75 (Several seedlings per pot)

Celery, Redventure

CERTIFIED ORGANIC! Beautiful, crunchy stalks full of celery flavour, but red in colour, fading to an almost golden pink. The contrast with the dark green leaves makes this variety a stunner! The celery leaves have a charming, powerfully savoury aroma, adding a wonderful rich undertone to vegetable soups. The stems are narrow and crunchy, with distinctive fibres - perfect for adding a crisp texture to dishes like potato salad.

Celery, Redventure Organic Matures in 100-110 days.

- ✓ Red, fading to golden pink
- ✓ Crunchy and flavourful
- ✓ Nice dark leaves

SKU: CEL-102 | **Seedlings:** \$4.75 (Several seedlings per pot)

Celery, Beijing Pink

CERTIFIED ORGANIC! This easy-to-grow variety completes the nutritional rainbow! Pink celery is popular in Beijing, where attractive pink stalks serve in high-end restaurants. This tasty Asian-type celery is an excellent choice for beginner gardeners, as it is much easier to grow than European-type celery. The flavour is yummy and lightly sweet, the texture is light and crunchy, and its eye appeal is unstoppable. Its brilliant bubble gum pink colour makes it a delightful addition to the veggie patch and market display. Sure to be the next exciting, colourful crop for fresh vegetable marketing. We are excited about the culinary potential of this nutritious and fun variety. It is easy to grow, and even the baby plants are stunning neon pink.

Celery, Pink Organic Matures in 100-110 days.

SKU: CEL-103 | **Seedlings:** \$4.75 (Several seedlings per pot)

Chard Swiss, Rainbow

CERTIFIED ORGANIC! Rainbow organic Swiss chard produces thick yellow, crimson, gold, orange, violet, purple, white, green, and pink stems with full-savoy leaves; the seeds can be planted in large containers. The colours are richest at full maturity, so give it some time to deliver the rainbow effect. The immature leaves are nutrient-dense, tender and excellent in salads, while the cooked mature leaves and stalks have a milder flavour than standard Chard and cooked Spinach.

Chard Swiss, Rainbow Organic Matures in 60 days.

- ✓ Thick multi-coloured stems
- ✓ Can be planted in large containers
- ✓ Open-pollinated seeds

SKU: CHA-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Chard Swiss, Ruby Red

CERTIFIED ORGANIC! This excellent and richly flavoured heirloom variety has wide stalks and veins that are bright scarlet red and deeply crumpled leaves that are rich dark green. Cook the stalks as you would asparagus and the leaves as you would Spinach, or enjoy both raw in salads. Ruby Red Swiss Chard or Rhubarb Swiss Chard is a reliable old variety that first arrived on the market in 1857 and has been winning fans and feeding families ever since. Swiss Chard is a rich source of vitamins A, K, and C, and is an excellent source of minerals, dietary fibre, and protein. Winner of the RHS Award of Garden Merit.

Chard Swiss, Ruby Red Matures In 60 Days.

- ✓ Wonderful richly-flavoured heirloom
- ✓ Rich dark green or purple leaves
- ✓ Open-pollinated

SKU: CHA-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Chard Swiss, Fordhook

CERTIFIED ORGANIC! Fordhook Swiss chard seeds produce dark green, savoyed leaves with thick, greenish-white stalks. This cold-hardy variety is versatile, reliable, and flavourful. It can also stand up well in the summer heat. The Fordhook in its name refers to Fordhook Farm, a research farm run for the Burpee seed company from the 1750s until 1981. Fordhook Swiss chard seeds perform well and provide abundant crops all season, even after a light frost. When harvesting leaves, carefully cut them from the crown; this will allow new leaves to sprout from the old crown and increase the harvest time of individual plants.

Chard Swiss, Fordhook Matures in 60 days.

- ✓ Does well in the summer heat
- ✓ Open-pollinated seeds

SKU: CHA-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Chives

CERTIFIED ORGANIC! Sow Chives Organic seeds at any time of year. Hardy, perennial, and easy to grow, the chopped stems and pink flowers add a fresh, mild green onion flavour to sandwiches, salads, and baked potatoes. Divide the clumps in spring or fall; if grown in containers, divide frequently enough to provide constant lateral growth. Chives are surprisingly hardy; harvest them all winter if given some protection from extreme cold. They are also drought tolerant, so they're good candidates for xeriscaping. In addition, edible flowers attract bumblebees, hoverflies, and other beneficial garden insects.

Chives Matures in 115 days.

- ✓ Easy to grow in containers
- ✓ Attracts pollinators
- ✓ Edible flowers

SKU: CHI-101 | **Seedlings:** \$4.75 (Several seedlings per pot)

Collards, Champion

CERTIFIED ORGANIC! Champion Collard is an improved version of the Vates collard with exceptional heat and cold tolerance. It developed as a hybrid in 1979 but is now a stabilized, open-pollinated variety; it's a cold-hardy member of the cabbage family grown for cooked greens. The compact dark-green, cabbage-like, thick leaves are gathered all winter and can be steamed, boiled, or stir-fried well into spring. Treat Champion collard seeds precisely as you would kale. They are both super cold and hardy but can tolerate summer heat with no problem. As with other cruciferous vegetables, some studies have indicated that consuming collard greens can reduce the risk of certain cancers, including prostate and pancreatic.

Collard, Champion Matures in 60-80 Days

- ✓ Steam, boil or stir fry
- ✓ Gathered all winter

SKU: COLL-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Collards, Groninger Blue

ORGANIC! Dutch heirlooms have been grown and eaten for centuries in central Holland. Young leaves are flat with tender, juicy red stems. These may be harvested in spring when about 6" and continue harvesting through the spring and winter. Grow as you would other kales. Use in salads, stir-fries, soups etc. and enjoy the delicate taste of this hardy winter variety that resembles Red Russian but has more tender and juicier leaves.

Collards, Groninger Blue Matures in 50 Days

- ✓ Light frost improves flavour and sweetness.
- ✓ Used as a baby green, microgreen, or bunch.

SKU: COLL-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Cucamelons, Mexican Sour Gherkins

CERTIFIED ORGANIC! Mexican sour gherkin is a flowering plant in the cucurbit family grown for its edible fruit. Its native range spans Mexico to Venezuela. A fast-growing, vining plant, the cucamelon is a frost-tender plant. It's a perennial in tropical climates but grown as an annual in other environments and planted in the spring. Small yellow flowers appear in the late spring to early summer, followed by the striped, green fruits, which are about the size of a large grape. The flesh of the fruits is white. Cucamelons have a unique crunch and a cucumber-like but slightly tangy flavour. Cucamelons self-pollinate from male and female flowers on the same plant with the help of the wind and garden pollinators.

Cucamelons, Mexican Sour Gherkins Matures in 60-70 Days

- ✓ Grow best in full sun, meaning at least six to eight hours of direct sunlight on most days

SKU: GHE-101 | **Seedlings:** \$4.75 (2 seedlings per pot)

Cucumber, Marketmore

CERTIFIED ORGANIC! Marketmore cucumber seeds yield a smooth, refined, dark-green slicer with a crisp crunch and sweet flavour. Marketmore cucumber is an early maturing cucumber that grows to 20-23cm (8-9") long with slightly shorter vines than other varieties, so you can space them more densely and get a higher yield in a small garden. Marketmore is very productive in the greenhouse and raised beds.

Cucumber, Marketmore Matures in 68 days.

- ✓ Makes great pickles
- ✓ High yielding
- ✓ Superb for slicing
- ✓ Highly disease resistant
- ✓ Resistant to mosaic, scab & more

SKU: CUC-101 | **Seedlings:** \$4.75 (3 seedlings per pot)

Cucumber, True Lemon

CERTIFIED ORGANIC! Lemon cucumbers are delicious, and you will love them. They are crisp, delicious, the size, shape, and colour of a lemon, and have a nice lemony flavour. Their skin isn't thick and waxy, so there is no need to peel. They are burpless, containing little to no cucurbitacin, which causes bitterness and indigestion. They are the perfect size for snacking and slice up great for sandwiches or pickles. They are a little late to start, but they stay productive later in the season and are easier to see when harvesting. Disease resistant and best eaten before they turn yellow. Lemon cukes are Heirlooms introduced initially in 1894.

Cucumber, True Lemon Organic Matures in 65 days.

- ✓ Lemony flavour and never bitter
- ✓ No need to peel
- ✓ Disease resistant
- ✓ Heirlooms, introduced in 1894

SKU: CUC-102 | **Seedlings:** \$4.75 (2 seedlings per pot)

Cucumber, Wisconsin SMR-58 Pickling

CERTIFIED ORGANIC! Developed at the University of Wisconsin in 1959, this ever-bearing cucumber produces masses of small crisp, sweet fruits over the growing season if kept well-picked—one of the best cucumber varieties for pickling. Wisconsin SMR-58 cucumber seeds performed better outdoors than in the greenhouse. Resistant to scab and Mosaic Viruses.

Cucumber, Wisconsin SMR-58 Pickling Matures in 55 days

- ✓ Crisp and sweet
- ✓ Produces masses of fruits
- ✓ One of the best for pickling

SKU: CUC-103 | **Seedlings:** \$4.75 (3 seedlings per pot)

Cucumber, Jamaican Burr Gherkin

CERTIFIED ORGANIC! A rare and unique cucumber relative originating in West Africa and brought to Jamaica via the trans-Atlantic slave trade in the 1500s. A popular vegetable in Jamaica, it is earlier and more productive than the standard strain. Best eaten when small and young; it has a mild, slightly tangy flavour and a pleasing crunch, burr gherkins are fantastic pickled, cooked in stews and stir fry, and raw. Very versatile, they can be used like cucumbers or cooked like squash. The plants are unbelievably productive, outproducing every other cucumber. They are more resistant to disease and insects than cucumbers and squash. Grow similarly to cucumbers, the love to climb up trellises.

Cucumber, Jamaican Burr Gherkin Organic Matures in 65 days.

- ✓ Originating in West Africa
- ✓ Tangy flavour
- ✓ Resistant to disease and insects

SKU: GHE-102 | **Seedlings:** \$4.75 (2 seedlings per pot)

Cucumber, Suvo Long

CERTIFIED ORGANIC! This cucumber is an Asian slicer reminiscent of those English-style cucumbers in grocery stores; this variety offers crisp, non-bitter, ribbed cucumbers with deep green colouring. Fruits grow to 12-14" in length, and their crispness is excellent for summer salads. Well-amended soil with consistent watering will give you good yields of good size fruits.

Cucumber, Suvo Long Matures in 65 days

- ✓ great for slicing

SKU: CUC-104 | **Seedlings:** \$4.75 (3 seedlings per pot)

Eggplant, Black Beauty

CERTIFIED ORGANIC! Dark purple to almost black-skinned, glossy, oblong, large fruits forming early on sturdy plants. This heirloom, grown for over 100 years, is a heavy producer with up to 12 fruits per plant but needs lots of heat. Try it under a cloche or with some plastic mulch over the soil. Even without extra help, Black Beauty Organic eggplant seeds will be productive in coastal gardens. Expect eight to ten fruits per plant. This variety performs well in containers that are five gallons or larger. Half barrels would be perfect.

Eggplant, Black Beauty Matures in 74 days.

- ✓ Heirloom
- ✓ Great in containers

SKU: EGG-101 | **Seedlings:** \$4.75 (2 seedlings per pot)

Eggplant, Diamond

CERTIFIED ORGANIC. A high-yielding open-pollinated variety, Diamond is an early maturing eggplant with cold-climate adaptation and can produce well even in northern climates. It is ideal for growing in regions with short seasons or cool summers. The appealing, slender 10-15 cm (4-6 inch) dark purple fruits hang in clusters and has a nice, firm texture with a mild flavour and no bitterness. Delicious, roasted or grilled with a splash of olive and a dash of salt and pepper.

Eggplant, Diamond Matures in 70 days

- ✓ Both high-yielding and open-pollinated
- ✓ Performs well even in cooler climates
- ✓ Slender fruits with a firm texture and no bitterness

SKU: EGG-102 | **Seedlings:** \$4.75 (2 seedlings per pot)

Eggplant, Gboma

ORGANIC! The Gboma Eggplant is a famous green throughout West, Central, East Africa and Southeast Asia; the plant also grows in the Caribbean and South America. The small, densely nutritious leaves, stems, and flowers are edible (best blanched and then sautéed) and prepared in a fashion similar to collard greens. The leaves are ready for harvest in 40 days. Gboma Eggplant is heat and drought-tolerant and a perfect staple green for anyone looking for a boost of healthy bitter greens. A top-notch tropical permaculture plant! Featured in William Woys Weaver's *100 Vegetables and Where They Came From*. Do not use this plant without cooking.

Eggplant, Gboma Matures in 80-100 Days

- ✓ Indigenous vegetables of Africa, the leaves are edible and nutritious
- ✓ Rich in micronutrients such as vitamins and minerals.
- ✓ Heat and drought tolerant

SKU: EGG-103 | **Seedlings:** \$5.25 (2 seedlings per pot) **LTD**

Eggplant, Little Finger

CERTIFIED ORGANIC! Slender, deep purple fruit with thin skin and mildly sweet flesh. The 15cm (6") fruits have very few seeds and grow in clusters. Best harvested young when skins are glossy, the tender fruits cook quickly and are also suitable for pickling. This early and productive eggplant is adapted for year-round growing and is a good choice for container growing.

Eggplant, Little Finger Matures in 65 days

- ✓ Early, productive
- ✓ 15cm (6") fruit with thin skins and few seeds
- ✓ Fruit grows in clusters

SKU: EGG-104 | **Seedlings:** \$4.75 (2 seedlings per pot)

Eggplant, Millionaire

CERTIFIED ORGANIC! Early, long, slender oriental type. 200g (7oz), glossy dark purple produces high yields of 8 to 10" long glossy dark purple eggplants. This early maturing plant produces high yields of 8 to 10" long glossy dark purple eggplants. Very delicious and tender. The creamy flesh is nearly seedless too. Great for stir-frying dishes and does well in hot weather. Suitable for container gardening, greenhouse, and open field production.

Eggplant, Millionaire Matures is 60-65 days.

SKU: EGG-105 | **Seedlings:** \$4.75 (2 seedlings per pot)

Eggplant, Rosa Bianca

CERTIFIED ORGANIC! This eggplant is simply elegant from Sicily; its light pink-lavender fruit has soft white shading and a gently scalloped form. Mild flesh is very popular with chefs and gardeners alike! Rosa Bianca Eggplant is a delicately sweet, mild flavour with a creamy consistency and no bitterness.

Eggplant, Rosa Bianca Matures in 70-80 Days

- ✓ An Italian heirloom variety
- ✓ Perfect for grilling and baking

SKU: EGG-106 | **Seedlings:** \$4.75 (2 seedlings per pot)

Eggplant, Shiromaru

ORGANIC! Shiromaru Eggplant is early and among the best-eating varieties. The tender white flesh stays firm in cooking; the rich flavour is edged with delicious floral notes that make it a unique addition to various dishes. Green eggplants are famous in Japan for their superior taste and beauty. Fruit can grow huge but remain perfect for eating.

Eggplant, Shiromaru Matures In 70-80 Days

Full Sun

SKU: EGG-107 | **Seedlings:** \$4.75 (2 seedlings per pot)

Eggplant, Snowy

CERTIFIED ORGANIC! This one has the most delicate flavour of all the eggplants we grow—probably the earliest, making it a great one for market gardeners. Very productive, and it has been one of our favourites for years—elegant snow-white eggplant with medium-thick skin and delicate sweet flavour. Snowy's texture is firmer and meatier than most, holding up well in cooking and handling. Upright, sturdy plants are well adapted to many growing conditions. Earliest maturing and well suited for containers as it is a compact plant.

Eggplant, Snowy Matures In 65 Days

- ✓ Open Pollinated
- ✓ Heirloom

SKU: EGG-108 | **Seedlings:** \$4.75 (2 seedlings per pot)

Gai Lan, (Chinese Broccoli, Gai Lon, Chinese Kale)

Gai Lan in Cantonese or jiè lán in Mandarin, is one of the healthiest Chinese leafy greens vegetable with thickish stems and small florets. It's a cruciferous vegetable, rich in nutrients. Gai lan is thought to have originated in the Mediterranean and is one of the oldest varieties of Brassica cultivated. You can find this vegetable with thicker, mature stems as well as younger, more tender stems. Gai Lan, Kai Lan, Chinese broccoli, or Chinese kale belongs to the cabbage group and tastes more like broccoli. It's often stir-fried with garlic or quickly blanched and served with oyster sauce. Like broccoli, it's incredibly versatile and hearty – you can substitute it anywhere you have broccoli or kale. All Gai Lan varieties are relatively cold-hardy for fall or winter harvests if some protection is provided. Gai Lan also makes extremely nutritious sprouts and microgreens. Its thick stems stay crunchy and succulent when steamed or stir-fried.

Gai Lan, Matures In 50-60 days.

SKU: GLAN-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Kale, Lacinato Organic

CERTIFIED ORGANIC! Sow Lacinato Organic kale seeds in the spring and early summer. A most elegant-looking vegetable, the long, dark green leaves shoot from the central stem like ostrich plumes. Lacinato is often referred to as Dinosaur Kale due to its large size and distinctive, prehistoric look; it grows 1m (3') tall with deeply blistered, strap-like leaves that are frost-hardy but tender when cooked. It is an heirloom descendant of Mediterranean kale. Plant Lacinato Organic kale seeds in your organic vegetable garden and harvest this popular and nutritious superfood from summer to late fall.

Kale, Lacinato Organic, Matures in 65 days.

- ✓ Upright growth
- ✓ Long, strap-shaped leaves
- ✓ Nutritious superfood

SKU: KAL-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Kale, Red Russian

CERTIFIED ORGANIC! Red Russian Organic Kale Seeds grow flat, toothed, grey-green leaves with bright purple stems and veins that brighten and sweeten after frosts. Tender for salads and good for bunching, the red and purple hues turn a rich, dark green colour when cooked. Red Russian kale is richer in vitamins and minerals than other greens and is disease-resistant— heirloom seed. This organic strain has very smooth, gently lobed baby leaves. Highly cold tolerant, this kale can overwinter in moderate climates.

Kale, Red Russian Days to maturity: 21 days for baby leaves, 50 days to full size

- ✓ Tender, sweet leaves great for salads
- ✓ Rich in Vitamins
- ✓ Cold tolerant, will overwinter.

SKU: KAL-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Kale, Vates Blue Curled

CERTIFIED ORGANIC! Sow slow-bolting Vates Blue Curled kale seeds in early spring for summer harvests or July for fall and winter harvests. Vates is a low-growing dwarf type with finely curled blue-green leaves. It's suitable for large containers (minimum five gallons) for patio growing. It grows to only 30-40cm (12-16") tall, and about 60cm (24") in diameter. Like most kale varieties, it's incredibly tender and sweet after a light frost.

Kale, Vates Blue Curled Matures in 50-80 days [slower in winter].

- ✓ Finely curled blue-green leaves
- ✓ Especially tender after frost
- ✓ Grows to only 30-40cm (12-16") tall

SKU: KAL-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Komatsuna, Green mustard

Often known as mustard spinach, its leaves are tender and mild. Komatsuna Green mustard is a cut-and-come-again crop at any growth stage, and it has excellent bolt resistance and cold tolerance to grow all year round. Komatsuna is a traditional ingredient in Japanese cooking; used steamed or stir-fried or in salads and soups. Green Komatsuna is one of the most nutrient-dense vegetables. It's delicious raw or cooked - try a bunch of leaves as a salad or toss some leaves into a soup or stir-fry. It works in containers, and its very cold hardy, so you can grow it all winter long if you provide some protection from hard frost.

Komatsuna, Green Mustard Matures In 21 Days.

SKU: MUS-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Komatsuna, Red mustard

HYBRID! Komatsuna Red mustard tolerates heat well and can be planted from spring to fall. Great for in containers on the balcony. The leaves are round, flat, and purple on top, with green undersides and stems. They are good in salads, sandwiches, and stir-fries. Use them as a baby leaf in salad blends or try them as microgreens. Komatsuna remains unfamiliar to many Western gardeners, but plants are fast-growing, productive, tasty, and easy to grow.

Komatsuna, Red Mustard Matures In 21 Days (Baby) & 40 Days (Full Size).

- ✓ Cold and heat tolerant
- ✓ Eat raw or cooked

SKU: MUS-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Leek, Musselburgh Organic

CERTIFIED ORGANIC! Musselburgh Leek originated in the Mediterranean and has been cultivated for over 3,000 years. Greek and Roman cultures also record medicinal uses for the Musselburgh leek. This vegetable is less well known than its close relative, the onion, but chefs and gardeners appreciate the leek for its sweeter, more subtle flavour.

Musselburgh Leek has large, very thick stems and a tasty mild flavour; it grows well in most locations; perfect for home or market; this old favourite is a considerable size and is very winter hardy.

Leek, Musselburgh Matures in 60-80 days.

- ✓ Summer & fall harvest
- ✓ Fast growth, Slender, uniform stalks, refined flavour

SKU: LEE-101 | **Seedlings:** \$4.75 (Several seedlings per pot)

Lettuce, Red Salad Bowl

CERTIFIED ORGANIC! Red Salad Bowl looseleaf lettuce is a real eye-catcher with burgundy red, deep-lobed leaves displayed in a full rosette creating a bowl-like effect. Red Salad Bowl matures early and is quite tender with a sweet taste. This variety is best grown in early spring or late summer / early fall, as the cool nights benefit a top-quality harvest. This variety should do well in low-light conditions. Add contrast to your lettuce bed with this tasty and remarkable lettuce. Plant them in precise spacing, reducing thinning and waste.

Lettuce, Red Salad Bowl Looseleaf Matures in 30 days.

- ✓ Dense frilly leaves with deep red edges
- ✓ Does well in low light conditions

SKU: LETT-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Lettuce, Rouge d'Hiver

CERTIFIED ORGANIC! Rouge d'Hiver (Red of Winter) displays striking red-brown, flat, smooth leaves with green veins forming a distinctive, loose Romaine head with good cold tolerance. Although Rouge d'Hiver lettuce seeds are an ancient HEIRLOOM variety, they are listed in Vilmorin's The Vegetable Garden (1885) as a hardy, productive plant that is slow to bolt. Superb flavour and an unusual ability to stand up to any weather conditions—Trust Rouge d'Hiver lettuce seeds for your organic vegetable garden this year.

Lettuce, Rouge d'Hiver Mature in 60 days.

- ✓ Romaine
- ✓ Flat, smooth leaves
- ✓ Heirloom from 1885

SKU: LETT-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Lettuce, Parris Island Romaine

CERTIFIED ORGANIC! Thick green outer leaves on enormous upright plants surround flavourful pale centres. Parris Island romaine lettuce seeds can be planted close together for a prolonged harvest of little leaves for gourmet salads. Given space and time to grow to full size, Parris Island forms vast heads up to 30cm (12") tall, but even at this crazy size, the leaves are tender and succulent, with a mild flavour. Parris Island romaine lettuce dates back to 1952; this heirloom lettuce received its name after the actual Parris Island off the coast of South Carolina. Parris Island Romaine is tipburn and mosaic tolerant. Winner of the RHS Award of Garden Merit.

Lettuce, Parris Island Romaine Matures in 75 days.

- ✓ Very nice texture
- ✓ Heirloom from 1952
- ✓ Pale centres on large, upright plants
- ✓ Flavourful

SKU: LETT-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Lettuce, Garden Party Lettuce Mix

CERTIFIED ORGANIC! This gala mix of reds, greens, and speckled lettuces for cut and come again harvest of leaves throughout the season-selected for use as baby greens. Plant for a continuous succession of young greens every three weeks, perfect for that summer dinner party or a quick addition to any weekday meal. Garden Party Lettuce Mix grows as well in the garden as pots on the balcony. These lettuces look spectacular in a container with diverse shapes, colours, and textures, almost like a bouquet. Harvest the baby greens with scissors for an instant, pre-mixed salad. Grow in full sun from fall to spring and in partial shade in the summer.

Lettuce, Garden Party Mix Matures in 28 days.

- ✓ Baby leaf
- ✓ Blend of green and red lettuces selected for baby greens

SKU: LETT-104 | **Seedlings:** \$4.75 (4 seedlings per pot)

Lettuce, Tom Thumb

CERTIFIED ORGANIC! Tom Thumb Lettuce dates back to 1830; this heirloom is the oldest American lettuce still in cultivation, which speaks to its charms. Plant Tom Thumb lettuce seeds for the most petite lettuce of all - a tennis ball-sized Bibb that will fit in the palm of your hand. The small heads have creamy yellow centers with medium green, slightly crumpled wrapper leaves. This variety works well in containers - even window boxes! It's a good candidate for indoor growing under lights and only needs a small container to grow well. Try growing some Tom Thumb lettuce seeds in a cold frame or unheated greenhouse in the winter.

Lettuce, Tom Thumb Matures in 50-70 days.

- ✓ It forms the smallest lettuce of all
- ✓ Grows well in containers and window boxes

SKU: LETT-105 | **Seedlings:** \$4.75 (4 seedlings per pot)

Lettuce, Buttercrunch

CERTIFIED ORGANIC! Buttercrunch butterhead lettuce seeds are a Bibb type lettuce that forms a tight little rosette of soft, dark-green, upward-facing leaves surrounding a tender, pale centre. The tiny hearts don't become bitter in hot weather. Later, plantings stand well into fall and grow well in cold spring frames. Buttercrunch lettuce is suitable for growing all winter if you can provide a cloche, greenhouse protection, or even a simple cold frame. Sow some extra early indoors in February for transplanting to the cold frame in March.

Lettuce, Buttercrunch Butterhead Matures in 67 days.

- ✓ Soft dark green leaves surround tender heart
- ✓ Hearts do not become bitter in hot weather

SKU: LETT-106 | **Seedlings:** \$4.75 (4 seedlings per pot)

Lettuce, Fast & Furious Blend Organic

CERTIFIED ORGANIC! Grow your own baby leaf Fast and Furious Blend Organic lettuce. Enjoy the contrast in colour, flavour, and texture from freshly cut salad greens. You will love the fast growth rate and impressive disease resistance. Perfect for hydroponics, aquaponics, or conventional tray growing - and excellent in patio containers. The Fast and Furious Blend is ideal for any organic grower with CSA boxes to fill or restaurants to accommodate.

Lettuce, Fast & Furious Blend Organic Matures in 35-40 days.

- ✓ Baby leaf
- ✓ Uniform, fast growth rate
- ✓ Perfect for tray growing

SKU: LETT-107 | **Seedlings:** \$4.75 (Several seedlings per pot)

Lettuce, Tamarindo Organic Baby Leaf

CERTIFIED ORGANIC! Tamarindo Organic lettuce is a new red looseleaf variety with improved texture and yield. Dark red coloured leaves with an erect growing habit make it ideal for growing to baby leaf stage for salad mixes. In addition, this variety has excellent flavour. Tamarindo lettuce has a high resistance to downy mildew races 1-26 & 28 and tipburn. For the home gardener, it means an unlimited supply of tasty, fresh salad greens.

Lettuce, Tamarindo Organic Baby Leaf Matures in 35-40 days.

- ✓ Looseleaf
- ✓ Excellent flavour!
- ✓ Dark leaves with an erect growth

SKU: LETT-108 | **Seedlings:** \$4.75 (Several seedlings per pot)

Mustard Green, Southern Giant Curled

CERTIFIED ORGANIC! Large, upright plants with crumpled leaves that have a delicious mustard taste; slow to bolt and very easy to grow. An old heirloom from the Southern U.S. and makes a mighty swell mess of greens. Beautiful, deeply frilled, bright-green leaves have an upright growth habit and a potent mustard flavour to liven up sandwiches. The flavour is milder in young leaves and when cooked.

Mustard Green, Southern Giant Curled Matures in 35-45 days.

SKU: MUS-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Ethiopian Kale

ORGANIC! Technically, this is a mustard and is grown as a leafy green in Ethiopia. The leaves have a milder flavour than either kale or mustard but are rich in nutrients. The flowers are highly attractive to honeybees, and the seeds are a potential source for biofuel. The plants are cold hardy and drought resistant. Grow for tasty, nutritious baby greens or full-size leaves. Blanching or stir-frying the full-sized leaves makes them more tender and tastier. Suitable for planting in containers or raised beds.

Ethiopian Kale Matures in 40-55 days.

SKU: MUS-104 | **Seedlings:** \$4.75 (Several seedlings per pot)

Tokyo Bekana

CERTIFIED ORGANIC! This cabbage looks like lettuce, but with a sweet cabbage taste. Narrow white stems that end in a very pale green curly leaf and are used in stir-fries or raw in salads. Easy to grow, it can be cut, and it grows back if the season is long enough. Tolerates cold and heat. Pick the leaves when they are still young and tender or when they are fully mature.

Tokyo Bekana Matures in 40-55 days.

SKU: MUS-105 | **Seedlings:** \$4.75 (Several seedlings per pot)

Mizuna

ORGANIC! Mizuna is a leafy green vegetable that's native to East Asia. It's also called Japanese mustard greens, spider mustard, or Konya. Like other leafy greens, mizuna is high in vitamin K. While commonly grown for commercial salad mixes, and you can enjoy Mizuna cooked or pickled. Like kale, mizuna is low in calories but high in several vitamins and minerals, including vitamins A, C, and K. A taste of Kyoto's culinary heritage, this heat-tolerant Mizuna variety was initially bred to withstand the heat and intense humidity of Japan's interior. Summer Mizuna is incredibly bolt resistant, even in punishing heat and moisture. Mizuna is suitable for several harvests and can be eaten at all stages. This variety is traditionally sown for high summer harvest when the juicy, watery stems make the most refreshing mid-day snack.

Mizuna Matures in 40-55 days.

SKU: MUS-106 | **Seedlings:** \$4.75 (4 seedlings per pot)

Mustard, Red Komatsuna

ORGANIC! Komatsuna Red mustard tolerates heat well and can be planted from spring to fall. The seeds do not need warm soil to germinate, so you can also plant the seeds in late winter for spring harvests. Try some in containers on the balcony. The leaves are round, flat, and purple, with green undersides and stem. They are good in salads, sandwiches, and stir-fries. Use them as a baby leaf in salad blends, or try them as microgreens. Plants are fast-growing, productive, tasty, and very easy to grow.

Komatsuna Red Mustard Matures in 21(baby) or 40 (full-size) days.

SKU: MUS-107 | **Seedlings:** \$4.75 (4 seedlings per pot)

Mustard, Green Komatsuna

ORGANIC! Komatsuna has long, slender stems with large, bright green spoon-shaped leaves. You can harvest it as a microgreen, a fully mature leaf, even after the flowering head develops. As the plant ages, the leaves become a deeper green colour, and its delicate stems grow wide, coarse and pale. In its young state, Komatsuna is tender and delicate with a sweet flavour and mild mustard bite. Larger leaves develop a more fibrous, hardy texture with an assertive crunch and a peppery mustard finish.

Komatsuna Green Mustard Matures in 21(baby) or 40 (full-size) days.

SKU: MUS-108 | **Seedlings:** \$4.75 (4 seedlings per pot)

Okra, Burgundy

CERTIFIED ORGANIC! Developed by Clemson University, this okra variety produces beautiful, deep red pods with green tips. The edible seed pods are lovely fried or pickled; you can find them in recipes popular in the southern US and Indian and Pakistani dishes. Red Burgundy okra can be grown for its beautiful colours as much as its edible reddish-purple pods. Stems are also a bright red colour, although leaves retain their green. Pods are tender when harvested at 4–7" in length, and plants will reach around 4–5' in height. This type does well in cooler conditions but prefers periods over 80°F during the day. Although less productive than most green okras, Red Burgundy produces pretty well compared to other red types. Low in calories and a good source of dietary fiber. Okra provides vitamin(s) A, B, C, folic acid, calcium, and zinc.

Okra, Burgundy Matures in 50-55 days

SKU: OKR-101 | **Seedlings:** \$4.75 (2 seedlings per pot)

Okra, Heavy Hitter

ORGANIC! Amazing production! Heavy Hitter Okra is the most productive okra, with plants producing as many as 250 pods per plant in a season and 44 young, tender pods in a single day. One dedicated farmer in Oklahoma selected and perfected this unbelievable heirloom over decades. Dry Creek Farm owner Ron Cook received seeds of Clemson Spineless okra in 1972 from a local gardening friend who had saved her seeds for decades. Once in his hands, Ron began to select for heavy productivity. After many years of improvement and selection, the Heavy Hitter is one of the most productive okras of all time, with no compromise to flavour and texture. Heavy Hitter Okra is your variety for those who love to grow a mess of okra. You can expect heavy crops of uniform pods, perfect for pickling and savouring all season long!

Okra, Heavy Hitter matures in 50-60 days

SKU: OKR-102 | **Seedlings:** \$4.75 (2 seedlings per pot)

Okra, Clemson Spineless

CERTIFIED ORGANIC! The Clemson Spineless Okra is by far the most popular cultivated variety of okra; it is an organic heirloom that won the AAS prize back in 1939. Over a short period in the heat of summer, plants will proliferate to 1.2m (4') and have many edible, cream-coloured flowers, followed by meaty, intensely flavoured pods that add brilliant texture to relishes and chutneys, but also complement stews, soups, and gumbo. Plants are spineless and are very easy to grow.

Okra, Clemson Spineless Matures in 56 days.

- ✓ Award winner
- ✓ Productive, spineless plants
- ✓ A much loved heirloom variety
- ✓ Thrives in hot weather

SKU: OKR-103 | **Seedlings:** \$4.75 (2 seedlings per pot)

Onion, Welsh Organic

CERTIFIED ORGANIC! Welsh onions are so named because they resemble leeks. Instead, they are closer to large scallions and are noted for their hollow stems. They can be harvested at an immature scallion or left to grow to full size. Welsh Onion Organic is a hardy biennial that will bloom the following summer if left to overwinter. A cluster of creamy white flowers appears that is very ornamental and much loved by bees. As a food crop, sow from March to May and harvest from July through December. The mature plants grow to 50cm (18") tall and are hardy to Zone 4.

Onions, Welsh Matures in 90 days.

- ✓ Certified organic seeds
- ✓ Harvest at any size

SKU: ONI-101 | **Seedlings:** \$4.75 (Several seedlings per pot)

Onions, Red Baron Organic

CERTIFIED ORGANIC! Red-shanked bunching onion. Red Baron produces quality purple-red-skinned bunching onions. Red shaft length is 3-4" long when grown without hilling. Red Baron Organic onion is a beautiful deep red bunching scallion with royal purple inner rings and a bright, sweet flavour. Harvest at 12-15" in length, just before the bulb swells. Performs well when planted in clumps of 4-5; succession planting recommended. It provides delicious flavour when cooked, pickled and in raw preparations.

Onions, Red Baron Matures in 115 days.

- ✓ Deep red coloration
- ✓ Excellent succession crop

SKU: ONI-102 | **Seedlings:** \$4.75 (Several seedlings per pot)

Onion, Cabernet Organic

CERTIFIED ORGANIC! With a vigorous habit and tight neck, Cabernet organic onion seeds produce high-quality bulbs with excellent holding ability. The bulbs will store for four to six months. The colour development of the internal rings is superb, with single centres and excellent uniformity. In addition, this variety boasts good resistance to foliar diseases, so it's among the best for organic production. Hybrid uniformity and disease resistance make this an excellent choice for home gardeners and market growers.

Onion, Cabernet Matures in 100 days. (Hybrid seeds)

- ✓ Hybrid uniformity and vigour
- ✓ Stores for 4 to 6 months
- ✓ Excellent colour development
- ✓ Resists foliar diseases

SKU: ONI-103 | **Seedlings:** \$4.75 (Several seedlings per pot)

Onion, Cortland Hybrid Organic

CERTIFIED ORGANIC! Cortland is a top-quality organic cooking onion. Medium-large, blocky, round bulbs with firm, thick skin, and pungent white flesh. Plants are healthy and tolerant of pink roots. It stores well, direct-seeded or transplanted.

Onion, Cortland Hybrid Organic Matures in 104 days.

- ✓ Certified organic
- ✓ Good cool weather growth
- ✓ Nice in containers
- ✓ Open-pollinated

SKU: ONI-104 | **Seedlings:** \$4.75 (Several seedlings per pot)

Onion, White Sweet Spanish

CERTIFIED ORGANIC! White Sweet Spanish onions have white flesh and skin and produce bulbs about 12 cm in diameter. Dark green foliage is fantastic for bunching. Medium to large bulbs resist greening and are mildly sweet with very firm flesh and ready for harvest one hundred twenty days after transplanting outdoors in the garden.

Onion, White Sweet Spanish Organic Matures in 120 days

- ✓ intermediate resistance to pink root
- ✓ 4-5" bulbs
- ✓ Open-Pollinated
- ✓ Good shelf life

SKU: ONI-105 | **Seedlings:** \$4.75 (Several seedlings per pot)

Pac Choi, Shanghai

ORGANIC! Bok choy, pac choy or pok choy is a Chinese cabbage used as food. Chinensis varieties do not form heads and have green leaf blades with lighter bulbous bottoms, forming a cluster reminiscent of mustard greens. Regular bok choy has white stalks and dark green leaves with a crinkly texture; however, Shanghai Pac Choi has wide, jade-coloured stalks shaped like soup spoons and light green smooth leaves with a mild, celery-like flavour. Pac Choi makes great substitutes for cabbage, spinach, and celery, to name a few. So try adding them to your dishes!

Pac Choi, Shanghai Matures in (baby) 30 days

SKU: PAC-101 | **Seedlings:** \$4.75 (3 seedlings per pot)

Peas, Cascadia Organic

CERTIFIED ORGANIC! Very sweet, round, plump pods that withstand heat. Cascadia peas perform well in the summer heat. While the plant is larger and more vigorous than Sugar Sprint, it suffers less from heat and tends to produce a larger plump pod with a sweeter taste than other summer types. Cascadia peas produce 3" medium-green pods on strong 24-28" plants. Organically grown seed.

Peas, Cascadia Organic Matures in 68 days.

- ✓ heat tolerant
- ✓ sweet taste

SKU: PEA-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Peas, Mammoth Melting Sugar

CERTIFIED ORGANIC! Among the largest available snow peas, these 10-13 cm (4-5") long pods are produced on 1.2m (4') tall plants that require a trellis. The large white flowers of this heirloom variety are pretty enough to use as cut flowers. Mammoth Melting Sugar snow pea seeds produce pods that are sweet and tender, even sweeter and more tender than Dwarf Gray Sugar. Plants are high yielding, early, uniform, and productive. This variety is more productive in cool weather, so it's perfect for early spring planting and a second planting in early August for fall production. In addition, mammoth Melting Sugar is Wilt resistant.

Peas, Mammoth Melting Sugar Matures in 70 days.

- ✓ Tender and sweet
- ✓ Large pods grow on tall plants
- ✓ Very productive

SKU: PEA-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Pea, Purple Mist Organic

CERTIFIED ORGANIC! Purple Mist Organic Pea is a Dutch heirloom that is a multi-purpose pea. You can enjoy the young pods as snow peas. The pods can be left to develop their unusual purple colour for mid-season shelling peas. Once the peas inside each pod have fully matured, they can be shelled, dried, and used for peas soup all winter long. The 1.5-2m (5-6') tall vines should be trellised and enjoyed as a striking ornamental. Purple Mist, an organic pea, is not **enation-resistant**.

Pea, Purple Mist Organic Matures in 80-85 days.

- ✓ Bright purple pods
- ✓ Multi-purpose pea

SKU: PEA-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Pea, Golden Sweet Snow

CERTIFIED ORGANIC! Golden Snow peas were discovered at a market in India. Brilliantly coloured pods and flowers are perfect for salads and stir-fries. Golden Sweet Snow Peas variety produces flat pods that are a beautiful, bright lemon yellow with a 6' tall vine with lovely purple flowers—collected from a market in India, nutritious and tasty. Golden Snow peas are an excellent source of vitamins A, C and K. They are a good source of folate, manganese and fibre and are a source of phosphorus, potassium, and protein. The bright yellow pods are a source of beta-carotene and provide beneficial antioxidants.

Pea, Golden Sweet Snow Matures In 60-70 Days

SKU: PEA-104 | **Seedlings:** \$4.75 (4 seedlings per pot)

Pepper, Aji Marchant (Hot 40,000-50,000 on the Scoville Heat Scale)
 CERTIFIED ORGANIC! 3" long, waxy-yellow fruit ripens to a classic orange-red. Aji Marchant is usually harvested under-ripe when still green/yellow and used for pickling. The immature peppers are exceptionally flavorful with a unique earthy-citrus bite that is not overly spicy but packs a punch when fully ripe. An excellent frying pepper at all ripeness levels, they also make tasty, dried pepper flakes after ripening to a bright red. Aji Marchant has a tantalizing history of being used in some of the Italian wax pepper pickles made by the California canning industry during the early and mid-1900s. Known by many different brand names, such as Chileno peppers, Sierra Nevada Chileno, Lone Pine Peppers, Vallecito Peppers, and California Italian Wax peppers.

Pepper, Hot Aji Marchant Organic Matures In 65 Days Green, & 80 Days Red.

- ✓ Great for pickling and frying

SKU: PEP-101 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Ancho (Poblano) (Mild Hot 1,000-1,500 on the Scoville Heat Scale)
 CERTIFIED ORGANIC! The Poblano, like the jalapeño, is a chilli with a famous flip side. Their dried versions are so popular that they have their names: the chipotle (jalapeño) and the ancho pepper (Poblano). It's part of what many call "the holy trinity" of dried Mexican peppers – all musts for making authentic Mexican cuisine, especially mole sauces. The Ancho is flavourful (earthy, sweet, and smoky). And, as it's a dried chilli, it lasts a long time in the cupboard (as long as it's stored properly), making it easy to keep around the kitchen—perfect for stuffing. They are referred to as Poblano when used fresh and Ancho when dried for seasoning. Plants are well-branched and adapted varieties with good yields in cool conditions. They are appropriately stored), making them an easy chilli to keep around the kitchen.

Pepper, Ancho (Poblano) Matures In 68 Days Dreen, 88 Days Red

- ✓ Frost-sensitive
- ✓ 4-6" fruits

SKU: PEP-102 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Cayenne Ring-O-Fire (Hot 20,000 on the Scoville Heat Scale)
 CERTIFIED ORGANIC! "And it burns, burns, burns," just like Johnny Cash said. Ring-O-Fire is an improved cayenne that matures earlier and has a glossy sheen with a fire engine red colour. Prolific and dependable plants reach heights of 18" tall and produce loads of thin-skinned 4" fruits, great for eating fresh, dried, or powdered. Heat is milder than other cayenne varieties, resulting in excellent peppers for fresh preparations.

Cayenne Pepper, Ring-O-Fire Matures In 45 Days Green & 60 Days Red

SKU: PEP-103 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Chinese 5 Colour (Hot 30,000-50,000 on the Scoville Heat Scale)

CERTIFIED ORGANIC! Screaming-hot little peppers turn a rainbow of vibrant colours, from purple, cream, yellow, and orange to red, as they ripen. The plants are great for containers inside. Just pick a few at any time to liven up your salsa. With its many hues and dark foliage, the Chinese 5-colour pepper is a natural beauty in the garden. It's multi-coloured, like the aurora pepper or Bolivian rainbow, but what makes it stand out from the pack is the unexpected shades it takes.

Pepper, Chinese 5 Colour Matures In 75-85 Days

SKU: PEP-104 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Ho Chi Minh Yellow Cayenne (Hot, 30,000 on the Scoville Heat Scale)

CERTIFIED ORGANIC! The Ho Chi Minh Hot Pepper is a very productive cayenne pepper originating in Southeast Asia. Peppers 4–6" long on 3' plants grow like large fingers turning from bright yellow to crimson in late August. Vietnamese refugees gifted this variety to Minnesota farmer Steven Schwen in the 1980s. Schwen named this pepper after the famous Vietnamese revolutionary leader. Cayenne peppers and other hot peppers are a concentrated source of many nutrients and can be a healthy addition to your diet.

Pepper, Ho Chi Minh Yellow Cayenne Matures In 68 Days

✓ Frost-sensitive

SKU: PEP-105 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Jalapeño Early (Medium Hot 2,500–5,000 on the Scoville Heat Scale)

CERTIFIED ORGANIC! Lots of bold flavour in a small, 3" pepper, 'Early Jalapeño' is better adapted to cooler climates than other jalapeños. They're versatile and hot enough to add a little kick to your favourite dish but mild enough for any meal. Enjoy the green, or allow it to ripen to red for a sweeter, bolder flavour.

Pepper, Jalapeño Early Hot Matures In 65 Days Green Or 85 Days Red.

SKU: PEP-106 | **Seedlings:** \$4.75 (2 seedlings per pot)

Peppers, Scotch Bonnet (Hot 350,000 on the Scoville Scale)

ORGANIC! Scotch Bonnet (also known as Bonney peppers, or Caribbean red peppers) is a variety of chilli pepper named for its supposed resemblance to a Scottish tam o' shanter bonnet. It is ubiquitous in West Africa as well as the Caribbean and closely related habanero. Some Caribbean islands have sweet varieties of Scotch Bonnet called cachucha peppers. Scotch bonnets are used to flavour many dishes and cuisines worldwide and are often used in hot sauces and condiments. It gives jerk dishes (pork/chicken) and other Caribbean dishes their unique flavour. Scotch bonnets are primarily used in West Africa, West Indian, Sri Lankan, and Maldivian cuisines and pepper sauces, though they often appear in other Caribbean recipes. It is also used in Nicaragua, Costa Rica and Panama for Caribbean-styled recipes such as rice and beans, rondón, saus, beef patties, and ceviche. Fresh, ripe Scotch Bonnets can change from green to yellow to scarlet red; some varieties of this pepper can ripen to orange, yellow, peach, or even chocolate brown.

Peppers, Scotch Bonnet Matures In 90-120 Days

SKU: PEP-107 | **Seedlings:** \$4.75 (2 seedlings per pot)

Peppers, Ace HYBRID F1

CERTIFIED ORGANIC! Extra-early, highly productive standard. Huge yields of medium-size, 3-4 lobed fruits. Has apparent tolerance to blossom drop as nearly every flower produces a pepper. Widely adapted but performs exceptionally well in cool climates where bell peppers are challenging to grow successfully. Best for early crops and particularly good for pack sales.

Peppers, Ace HYBRID F1 Matures In 50 days green or 70 days red ripe.

SKU: PEP-108 | **Seedlings:** \$4.75 (2 seedlings per pot)

Peppers, Bright Star

Bright orange fruits with pleasant, sweet, crisp flavour. Produces blocky, 3-4", mostly 4 lobed fruits. One of the best orange varieties for outdoor production. Plants form strong, medium-sized plants.

Peppers, Bright Star HYBRID F1 Matures In 75 days green or orange.

SKU: PEP-109 | **Seedlings:** \$4.75 (2 seedlings per pot)

Peppers, California Wonder

SKU: PEP-110 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Doe Hill Sweet

CERTIFIED ORGANIC! A 19th-century family heirloom from the Appalachian town of the same name (population 75) in Highland County, VA. Averaging about five lobes, it has surprisingly thick flesh for its diminutive size and just fantastic, very sweet flavour. Early and prolific, it is borne on short bushy 2-2 ½' plants that don't require much support. This one is wonderful for crudite plates, to skewer and grill, and for stuffing and served as an appetizer.

Pepper, Doe Hill Sweet Matures In 60-70 Days

SKU: PEP-111 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Earliest Red

ORGANIC! Few bell pepper varieties can compete with the reliable plants produced by California Wonder pepper seeds. In a greenhouse, open field, or backyard vegetable garden, this is the variety to grow if you love big, blocky sweet peppers that mature from green to bright fire engine red. The four-lobed fruits are heavy with perfectly smooth skins and grow to nearly 13cm (5") long and 10cm (4") wide on plants that can grow to 65cm (28") tall. Give this excellent variety of fertile soil and moisture throughout the growing season, and it will reward you with abundant, perfect fruits with the flavour and moisture content you expect.

Pepper, Earliest Red Matures In 65-75 days.

SKU: PEP-112 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Jimmy Nardello

CERTIFIED ORGANIC! A relative of the Red Cayenne pepper, the Jimmy Nardello pepper is a fast-growing sweet pepper that starts green and matures to red. It was brought to America by the Nardello family in 1887; the long, skinny peppers are ideal for frying as they can be fried whole or sliced lengthwise to expose the seeds. The Jimmy Nardello pepper is a deep and rich red and, when bitten into, has a sweet and fruity flavour with hints of apple. The six to nine-inch long thin peppers are perfect for cooking or adding to raw salads, making them highly versatile, as they have little to no heat. They are relatively easy to grow, and the plant has a compact profile that works for smaller spaces and container gardening. Its official name is Jimmy Nardello Sweet Italian Frying Pepper.

Pepper, Jimmy Nardello Matures In 80 Days

SKU: PEP-113 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Lipstick

CERTIFIED ORGANIC! The Lipstick Pepper is a delectable bright red pimento-type pepper that performs exceptionally well in northern climates. These 4-inch-long pointed peppers have super sweet, thick flesh, making them ideal for eating fresh and cooked. It is a widely adaptable variety that will produce plenty of fruit, even in northern climates with cooler summer weather.

SKU: PEP-114 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Purple Beauty Sweet

CERTIFIED ORGANIC! Purple Beauty pepper seeds produce compact, bushy plants with thick protective foliage. The fruits begin to form mid-summer, starting as big, blocky, meaty three to four-lobed green bell peppers before maturing to a stunning bright purple colour. Purple Beauty was grown from the original hybrid Purple Belle and now produces open-pollinated seeds for seed saving and home seed production. The flavour of these remarkable fruits is mild, sweet, and succulent, with a fine, crispy texture. The cut fruits look spectacular mixed with yellow or orange peppers.

Pepper, Purple Beauty Sweet Matures In 70-75 Days

SKU: PEP-115 | **Seedlings:** \$4.75 (2 seedlings per pot)

Pepper, Zulu

ORGANIC! This impressively 'eggplant black' coloured bell pepper is crisp with thin flesh. Zulu Sweeey Pepper is a rare variety originating from Poland. The fruits are dark blue (due to anthocyanin) at the maturing-green stage. They mature to red with blue marbling. They are rich in vitamin C, provitamin A, and potassium source. It has a fantastic piquant aftertaste of spicy zip minus the nip of hot pepper, and this sweet pepper is sure to please even the harshest critic! Zulu pepper would be a great addition to salsa, salad and canning for winter and freezing.

Pepper, Sweet Zulu Matures In 70-75 Days

SKU: PEP-116 | **Seedlings:** \$4.75 (2 seedlings per pot)

Purslane, Tall Green

CERTIFIED ORGANIC! This hot weather plant produces handfuls of thick, succulent, green leaves that add a light lemony crunch to salads. Purslane is a nutritional powerhouse with more Omega-3 fatty acids than any other leafy vegetable and more vitamin C than spinach. Leaves are much larger than the wild type, and the plant grows upright, not prostrate. Purslane contains more Omega-3 fatty acids than any other leafy vegetable. Cut Tall Green Purslane almost to the ground, but keep two leaves at the base for re-growth. Purslane self-sows if allowed to flower.

Purslane Matures in 60 days.

SKU: PURS-101 | **Seedlings:** \$4.75 (1 seedlings per pot)

Shado Beni

Shadow Beni is a leafy herb native to the Caribbean and Central America, and it's strong in flavour with numerous medicinal benefits. Shado Beni, also known as Culantro or Chado Beni, is widely used in these regions' cuisine and appears in Asian foods. Culantro is known as Chadon Beni or Shado Beni in the English-speaking Caribbean. It's used extensively in the cuisine of Trinidad and Tobago; it's one of the essential herbs in cooking in that twin-island republic. Shadow Beni is used in making recaito or sofrito in Puerto Rican cuisine, and it's sometimes used in Asian sushi. It's native to Mexico and South and Central America, but it's also cultivated in Hawaii, as well as in Cambodia, Vietnam, and Mexico. The plant's name comes from its ability to grow where there is little sunlight. Shadow Benny has a more robust, peppery flavour; the stalks can be eaten as well and taste similar to celery but with more spice. Shado Beni is rich in calcium, iron, carotene and riboflavin.

SKU: SHAD-101 | **Seedlings:** \$4.75 (5 seedlings per pot)

Shiso Perilla, Red

CERTIFIED ORGANIC! Red Perilla shiso seeds grow into substantial plants with broad, deep purple leaves. The dark ruby leaves of this sharply flavoured Asian herb have nicely frilled edges. They look slightly like stinging nettle leaves but rounder and without any prickles. Grow as a bright-red micro-green, let the plants mature and enjoy the leaves in pho, salad rolls, or other dishes. Shiso makes a beautiful pairing with unctuous dishes like sushi, and it combines beautifully with cilantro, mint, Thai basil and fresh lettuce leaves. Shiso has a similar growing season to basil and performs just as well in containers as in the garden bed. Provide full sun and well-drained soil.

Spinach, Bloomsdale Matures In 70 Days

- ✓ Widely used in Asian cuisines
- ✓ Strongly flavoured
- ✓ Pairs with other sharp herbs
- ✓ Easy to grow!

SKU: SHI-101 | **Seedlings:** \$4.75 (2 seedlings per pot)

Spinach, Bloomsdale

CERTIFIED ORGANIC! Long-Standing Bloomsdale spinach is a prevalent variety produced for a long time; its glossy, dark green leaves are rich in iron, and the crinkled leaves have a lovely thick texture. This excellent cool-weather vegetable is slow to bolt and easy to grow in rich, well-drained soil.

SKU: SPI-101 | **Seedlings:** \$4.75 (4 seedlings per pot)

Spinach, Molokhia Egyptian

CERTIFIED ORGANIC! The most widely used vegetable in Egypt, and other parts of Africa, Melokhiya, could be called the "Powerhouse of Nutrition." Packed with essential minerals such as calcium, iron, potassium, and magnesium. One serving contains 410 mg of calcium. Add Molokhia to a medley of mixed greens and stews; use the young leaves and shoots to flavour, thicken soups and stews, and dry the leaves for winter dishes. This plant belongs to the same family as the Okra, and durian.

Spinach, Molokhia Egyptian Matures in 40-60 Days

- ✓ Leaves and seed pods are edible
- ✓ Sensitive to transplant shock, so best started in compostable pots

SKU: SPI-102 | **Seedlings:** \$4.75 (4 seedlings per pot)

Spinach, Regiment Hybrid

CERTIFIED ORGANIC! Vigorous plants pack on the weight, producing healthy bunches in no time. Very quick-growing, lightly savoyed leaves with a distinctive arrowhead shape and bright-eyed medium-green finish: excellent texture and mild flavour. Works well in all seasonal slots; good resistance to bolting.

Spinach, Regiment Matures in 35 Days

SKU: SPI-103 | **Seedlings:** \$4.75 (4 seedlings per pot)

Spinach, Red Malabar

ORGANIC! Malabar Spinach plants grow in India and throughout the tropics, primarily in the moist lowlands. Malabar Spinach is a tropical leafy green named after a coastal region in southwestern India. It is botanically not a true spinach, yet it resembles it. The dark green, glossy, oval or heart-shaped leaves and shoots are eaten raw in salads or cooked. The taste of Malabar spinach is mild, similar to Spinach, with peppery notes and a hint of citrus. Once cooked, the texture is different from Spinach. The thick, semi-succulent leaves become gluey, not unlike Okra. Malabar Spinach grows vertically and needs a trellis to support its fast growth. In hot climates with frost-free winters, you can grow it as a perennial; otherwise, it's an annual vegetable like Spinach. It is an edible plant and an attractive addition to a garden bed, especially the red-leaf variety

Spinach, Red Malabar Matures In 70 Days

SKU: SPI-104 | **Seedlings:** \$4.75 (4 seedlings per pot)

Squash, Waltham Butternut

CERTIFIED ORGANIC! Waltham Butternut Squash is a time-tested heirloom variety that remains the gold standard among butternut squash varieties. This variety produces large fruits with small seed cavities and plenty of delicious flesh for making roasted squash, pies, soups and more! Developed in Massachusetts, this variety was an AAS winner in 1970.

Waltham Butternut Squash produces vigorous vines that require plenty of room to grow. At full maturity, fruits will average 6 lbs each. This variety is known for its storage potential and ability to sweeten after harvesting. Fruits will have a sweeter flavour two months after harvesting when the sugars have had a chance to mature inside the fruit. The storage potential is long and can sometimes be over a year.

Squash, Waltham Butternut Matures In 105 Days

SKU: SQU-101 | **Seedlings:** \$4.75 (2 seedlings per pot)

Squash, Burgess Buttercup

CERTIFIED ORGANIC! In 1932, the Burgess Seed Company in Illinois introduced the Burgess Buttercup squash; since then, this reliable heirloom has produced small, 1.5kg (3 lb) turban-shaped fruits with dark green skins and the unmistakable navel or dome at the blossom end. The golden orange flesh inside each fruit is sweet and finely textured, never watery. The thin skins are tough, which is vital for long-term storage. Unfortunately, these popular squashes won't last right through winter the way a Hubbard or delicata might.

Squash, Burgess Buttercup Matures in 115 days.

SKU: SQU-102 | **Seedlings:** \$4.75 (2 seedlings per pot)

Squash, Sucrine Du Berry

CERTIFIED ORGANIC! A famous old traditional variety from the heart of France. It has a sweet, musky fragrance and a delicious, sweet flesh used in jams, soups, and many French recipes. Small 3-5 lb. fruit is perfect for roasting and has deep orange flesh. Oblong, bell-shaped fruit is tannish-orange in colour when mature.

Squash, Burgess Buttercup Matures in 100 days.

SKU: SQU-103 | **Seedlings:** \$4.75 (2 seedlings per pot)

Tomatoes – Cherry & Salad Types

Tomato, Black Cherry (Indeterminate)

CERTIFIED ORGANIC! Black Cherry tomato seeds produce hardy, vigorous vines loaded with gorgeous purple to mahogany brown cherry tomatoes 2.5 cm (1") round. Enjoy prolific yields all season long! Rich, juicy cherry tomatoes with wonderfully complex, sweet flavour and firm texture. The little fruits of this variety look exotic and taste irresistibly delicious—a great snacking tomato, excellent in bruschetta. Black cherry plants are naturally disease resistant. Vines typically grow at least 150 cm (60") and require caging or staking for support. Allow these cheery tomatoes to ripen on the vine for best results, and harvest regularly. Fruits are ripe when they turn olive/eggplant in colour and pop readily off the stem with a roll of the fingers.

Tomato, Black Cherry Matures In 65 Days.

Tomato, Gold Nugget (Determinate)

CERTIFIED ORGANIC! The award-winning Gold Nugget tomato has quickly become an international favourite, celebrated for its unparalleled sweetness, colour, and early yields. This tomato produces exceptional quantities of small 1 oz cherry tomatoes bursting with sweet, thin skin goodness with the characteristic low acidity of yellow tomatoes. Developed in the 1980s by Oregon State University, Gold Nugget has since been awarded England's Royal Horticultural Society's (RHS) Award of Garden Merit. Determinate plants mature to a compact 24" tall yet boast countless golden cherry tomatoes all season. This determinate tomato is an excellent choice for container gardening or those with limited space. A first-class choice!

Tomato, Gold Nugget Matures In 55 Days

SKU: TOM-102 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomatoes, Indigo Rose (Indeterminate)

CERTIFIED ORGANIC! Indigo Rose organic tomato plant produces the most extraordinary, dark purple-skinned tomatoes currently available. Developed by Jim Myers at Oregon State University using traditional plant breeding techniques, Indigo Rose Organic tomatoes are the first improved tomato variety worldwide with the powerful antioxidant anthocyanin in the fruit. Indigo Rose organic tomatoes hang in clusters from vigorous, sprawling vines with wild, curly leaves. Plants are hardy and have good disease resistance. As the fruit matures, the skin will become purple when exposed to light, and the fruit tends to have a purple crown. The purple hue is caused by the antioxidant anthocyanin reacting to the sun. The fruits are ripe when they change from a shiny blue-purple to a dull purple-brown, exposed to the sun and green to red where there is no sun exposure. The fruit also softens when ripe.

Tomato, Indigo Rose Matures in 75 days

SKU: TOM-103 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Matt's Wild Cherry (Indeterminate)

CERTIFIED ORGANIC! "The wild tomato with great flavour." Matt's Wild Cherry Tomato is an heirloom from a Hidalgo, Mexico, family where similar types grow wild. The small red cherry tomatoes are incredibly productive and flavourful. Best of all, they are early and disease resistant. A winner of many taste tests! Matt's Wild Cherry Tomatoes pack a sweet, tart, and flavourful punch. (55 days from transplant)

- ✓ Full Sun

SKU: TOM-105 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomatillo, Toma Verde (Semi-determinate)

CERTIFIED ORGANIC! Toma Verde Tomatillo seeds are easy to grow with prolific yields of early-maturing tomatillos. Compact heirloom plants from Toma Verde tomatillo seeds are hardy and adapt well to various climates. Fruits average 5 cm (2") in diameter. The firm, uniform green fruit is wrapped in a papery husk; it turns from green to tan and splits open as the fruit reaches full size and maturity. Fruits are tart when enjoyed fresh and turn sweet when roasted. A Mexican favourite, try Toma Verde in savoury sauces, snappy salsas, soups and dips. This plant works well in 5-gallon (or larger) containers, but it forms a large, somewhat sprawling bush, so it **benefits from some support, like a tomato cage.**

Tomatillo, Toma Verde Matures in 70 days

- ✓ Highly adaptable to a variety of climates
- ✓ Prolific, early yields
- ✓ Open-pollinated Heirloom

SKU: TOM-106 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Peacevine Cherry (Indeterminate)

CERTIFIED ORGANIC! Peacevine is a superfood among tomatoes! The Peacevine tomato gets its name due to its extra high levels of GABA, one of the amino acids our bodies need for calmness, rest and sleep. Peacevine could help eliminate sleepless nights because you'll likely be tired after harvesting its massive amount of fruit! These vines grow and grow and produce tons of 3/4-inch, absolutely delicious red cherries.

Tomato, Peacevine Cherry Matures In 75 Days

Tomato, Grappoli D'Inverno (Semi-determinate)

CERTIFIED ORGANIC! Grappoli d'Inverno's small bushes ripen early with 1-2 oz plum-sized fruit that keeps very well once picked. Unimpressive when eaten fresh, the flavour transforms into deliciousness once dried. It's also good roasted—a selection of a type of tomato with strains grown in many regions of Italy for winter storage. Tie this fruit in ristras, hang it in a cool place and store it for months. This practice is done successfully in Italy, making the perfect homemade pizza topping all winter. Grappoli d'Inverno means 'bunches of winter' in Italian.

Tomato, Grappoli D'Inverno Matures In 60-70 Days

SKU: TOM-111 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Tiny Tim (Determinate)

Organic! Tiny Tim cherry tomatoes are easy to grow and produce unique dwarf plants that work very well in small containers, window boxes, hanging baskets and small garden spaces. As a potted plant, Tiny Tim Tomato seeds may be grown at any time of the year and is a mid-season producer for fruit. A great centrepiece and point of interest in any garden, Tiny Tim cherry plants yield masses of sweet/tart scarlet miniature cherry tomatoes about 2cm (1") in diameter. A perfect salad or snacking tomato! Tiny Tim tomato plants grown in optimum conditions will produce incredible yields of miniature fruit that often outweigh the plant 3:1. This small, tidy, determinate plant with deep green leaves typically grows to 20 - 40 cm (8-16") tall and 17 cm (6 1/2") in diameter. Plant in full sun to maintain the dwarf habit. Tiny Tim Heirloom tomato plants will thrive in less sunlight than other varieties; however, fruit yields will be less and grow larger and less tidy. The University of New Hampshire introduced the Tiny Tim Heirloom miniature cherry tomato variety in 1945. Tiny Tim tomato plants are resistant to, or tolerant of, the following tomato diseases: Alternaria Stem Cancer and Stemphylium.

SKU: TOM-112 | **Seedlings:** \$4.75 (1 seedling per pot)

TOMATO - PLUM/PASTE

Tomato, Black Plum (Indeterminate)

CERTIFIED ORGANIC! The 'Black Plum' tomato originates from Russia. It is hugely popular in the USA and Canada today, just as in Europe – a firm favourite of tomato enthusiasts! Black Plum tomato plants produce an abundant long, steady crop of 2", elongated, oval, plum-shaped fruits that are coloured with beautiful deep mahogany, dusky-green shoulders, and garnet red flesh; they ripen around the end of July. The fruits have unique, sweet, tangy, rich, and complex flavours. The more sun the tomatoes receive, the darker their colour. Each Black Plum tomato can weigh up to 70 grams and are sweet, fruity and tangy – typical of many dark tomato varieties. Most dark tomatoes are heirloom varieties, and Black Plum tomatoes are no exception. Presented in a bowl, they appear like exotic jewels. Drying enhances the sweet and tangy flavour of Black Plum tomatoes.

Tomato, Black Plum Matures In

- ✓ Hardy, disease-tolerant, and low-maintenance
- ✓ Needs trellis

SKU: TOM-113 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Napoli Roma (Determinate)

CERTIFIED ORGANIC! A commercial production tomato, bred for early maturity and concentrated yields. Medium-sized plants grow to 4' tall and produce large quantities of 2-3 oz, meaty, Roma-shaped red fruit with a small point on the blossom end. Suitable for processing into sauce or for canning whole once peeled. The raw flavour is perfect for a Roma, excellent to eat fresh in salsas and salads. Napoli Roma Tomato is one of the best sauce tomatoes with excellent yield and flavour; they are resistant to cracking, blossom end rot, and Fusarium wilt.

Tomato, Roma Matures In 70 Days

SKU: TOM-114 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Amish Paste (Indeterminate)

ORGANIC! Amish Paste Roma tomato plants produce large, heavy fruit that will reward your growing efforts and palate with the most decadent sauces and thickest pastes. These lovely, firm heirloom tomatoes are a culinary favourite. The deep red flesh is firm, not too juicy, and the taste balances sweet and rich. The plants have a long growing season and will produce bountiful yields of flavourful fruit until late fall. Vines often reach over 6 feet and will require heavy staking for support. The shape of Amish Paste tomatoes varies from "ox heart" to "plum" - both may often be found on the same plant at the same time. Vines continuously produce small clusters of large, up to 226g (8 oz), deep-red fruit nearly seedless.

Tomato, Amish Paste Matures In 70-75 Days

SKU: TOM-115 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato - Slicing

Tomato, Big Beef Plus (Indeterminate)

HYBRID! Classy Big Beef Plus boasts better flavour with excellent old-fashioned adaptability, disease resistance, appearance and a visibly deeper red—a prevalent choice for fresh market and home gardeners. Extra-large, smooth, beefy fruits are uniform and, on average, 350-450g. Large, vigorous, indeterminate plants are healthy and set early, with high yields even under cool conditions. So cut up this tasty tomato for your favourite salad, and enjoy!

Tomato, Big Beef Plus Matures In 73 Days

- ✓ Require staking

SKU: TOM-116 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Black Beauty (Indeterminate Heirloom)

ORGANIC! A dark, meaty, very rich-fleshed tomato with extreme anthocyanin expression (the same antioxidant in blueberries and blackberries). Black Beauty Tomatoes are the darkest tomatoes, so dark that some tomatoes turn solid blue-black on the skin. Deep red flesh is among the best-tasting of all tomatoes. Rich, smooth and savoury with earthy tones. It hangs nicely on the vine and stores very well, and the flavour improves with room-temperature storage. Dave Kaiser tasted it at the 2015 National Heirloom Exposition and proclaimed it the BEST tomato he had ever eaten!

Tomato, Black Beauty Matures In 80 Days

- ✓ Full Sun

SKU: TOM-117 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Black Krim (Indeterminate)

CERTIFIED ORGANIC! Black Krim combines bold, smoky flavour and good texture with an unusual appearance. Originally from the town of Krymysk near the Black Sea, Black Krim Tomatoes are exceptionally hardy with dark purple to mahogany skin, green shoulders and green tinted flesh that get darker with more heat and sunlight—high yielding. Black Krim Tomatoes are naturally disease resistant, and the plants adapt well to adverse conditions in various climates. Healthy, attractive vines reach 1.8 metres (6') or more and require heavy staking or caging to support excellent large, plump fruit yields. The fruits mature late and are prolific producers. A favourite of gourmet chefs, this unique heirloom tomato consistently wins top place and receives rave reviews at taste trials. The fruits are highly juicy with incredibly complex sweet, smoky flavours and a hint of saltiness. Drizzle with olive oil and a sprinkle of sea salt for a zesty snack. Also great sliced with fresh mozzarella and Basil and drizzled with olive oil and balsamic vinegar.

Tomato, Black Krim Matures In 80 Days

SKU: TOM-118 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomatoes, Beefsteak (Indeterminate)

CERTIFIED ORGANIC! The Beefsteak consistently performs with heavy yields of sizeable solid fruit weighing up to 9 oz. The cheeks of the tomato bulge and stand out in very distinct sections. Naturally, wilt resistant and less prone to pests and disease than other tomato species. By far one of the largest tomatoes, you can grow in your garden.

Tomato, Beefsteak Tomatoes Matures in 80 days.

- ✓ Great traditional tomato flavour
- ✓ Wilt resistant
- ✓ Large meaty fruit
- ✓ Pest and disease resistant

SKU: TOM-119 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Black Prince (Indeterminate)

CERTIFIED ORGANIC! Black Prince Tomato is a Siberian heirloom that does well in cool climates. Originally from Irkutsk, Siberia, this delicious tomato ripens earlier than most black tomatoes. The 2 ½ inch fruit is deep reddish brown, juicy, with regular leaf foliage. It thrives in cool climates and is rated as one of the **best for flavour** and one of the earliest maturing.

Tomato, Black Prince Matures In 70 Days

SKU: TOM-120 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Black Sea Man (Determinante)

CERTIFIED ORGANIC! Black Sea Man Tomatoes may be among the ugliest yet most delicious tomatoes grown in gardens across North America. This Russian heirloom is dark green and burgundy-red, weighing 12 to 16 ounces. Black Sea Man Tomato plants will mature to about 4 feet tall and require stakes or supports. Black Sea Man Tomatoes are annual plants, meaning the plants will grow quickly from seed, produce fruits through the summer months, and die with the first frost. A perfect variety for slicing, to enjoy as a snack or add to a salad. The Black Sea Man Tomato is an outstanding tomato for sandwiches and salads. This Black Sea Man heirloom tomato does well growing in mid-sized containers. Harvest when the tomato is fully ripe and has expressed its full colour for the best taste—a great early black tomato.

Tomato, Black Sea Man Mature In 75 Days

SKU: TOM-121 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Cosmonaut Volkov (Indeterminate)

CERTIFIED ORGANIC! A Ukrainian heirloom named by Russian space engineer/gardener Mikhailovich Maslov, who called the heirloom tomato from his family garden after his comrade Vladislav Volkov, a Russian astronaut, who died while returning from the first visit to the Earth's first space station. Russians grow this variety for prize-winning, 1-2 lb. slightly flattened, fluted, pink/red beefsteak tomatoes with a full, complex flavour and nice acid/sweet balance—a good variety for cooler growing regions.

Tomato, Cosmonaut Volkov Matures In 72 Days

SKU: TOM-124 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Earl Edgecombe (Indeterminate)

CERTIFIED ORGANIC! This heirloom from New Zealand is one of the best-tasting full-size orange tomatoes we've grown. The flavour is rich, sweet and tart all at once. The texture is smooth and meaty. Fruits are uniformly round, blemish-free and resistant to cracking and blossom end rot. This is an English heirloom dating back to the seventh earl of Edgecombe. When the 6th earl of Edgecombe died, the next in line was a sheep farmer in New Zealand. So when he returned to claim the title, this tomato travelled with him.

Tomato, Cosmonaut Volkov Matures In 72 Days

SKU: TOM-125 | **Seedlings:** \$4.75 (1 seedling per pot)

Tomato, Green Zebra (Indeterminate)

CERTIFIED ORGANIC! The Green Zebra Tomato plant yields wildly popular, beautiful fruit that is chartreuse in colour with deep lime green stripes. Green Zebra is an easy-to-grow mid-season tomato. Plants mature late with prolific yields of tasty fruit 4-6 cm (1.5-2") round. Skin is smooth, and interior texture is firm and pulpy. Green Zebra tomatoes have an excellent, unique rich taste commonly described as sweet with an intricate zing. A favourite of gourmet chefs, use Green Zebra to enhance the flavour of salsas, soups and entrees. Also, enjoy fresh from the garden for a zesty snack! Heirloom breeder Thomas Wagner developed green Zebra tomatoes in the mid-1980s from 4 varieties of heirloom tomatoes. Vines show some resistance to Septoria Leaf Spot; for the best flavour, allow Green Zebra tomatoes to ripen on the vine fully. A slight yellowish blush in colour and a firm feel with a bit of "give" signs the fruit is ripe for picking. Fruit taste bitter if picked too early and may become mealy if left too late.

Tomato, Green Zebra Matures In 75 Days

✓ Unique, amazing taste

Tomato, GinFiz F1 (Indeterminate)

CERTIFIED ORGANIC! A Protected-culture tomato that offers traditional, heirloom character plus leaf mould resistance, reduced stem scarring, and tolerance to shoulder cracking. Provides a strong early flush of fruit to complement Margold's later, more sustained production. Nice balance of sweetness and acidity. Fruits avg. 8–12 oz. High resistance to Fusarium crown and root rot, leaf mould, tomato apex necrosis virus, tomato mosaic virus, and Verticillium wilt.

Tomato, Market Miracle Matures In 70 Days

SKU: TOM-128 | **Seedlings:** \$4.75 (1 seedling per pot)

Yu Tsai Sum

CERTIFIED ORGANIC! Yu Tsai Sum is a type of choi sum. This summer crop is also known as Yu Choi. Yu Tsai Sum is grown for its tender flower bud stalks (yellow flowers) and glossy, bright green leaves; it is mild and sweet when cooked briefly. Stems will be thick (0.5-1cm (.25")) if grown and watered well. For large plants, sow in rows 30-45cm (12-18") apart. Cut the flower bud stalk with a few leaves - new shoots will grow from a leaf axil. Plant Yu Tsai Sum seeds in early summer, up to 6 weeks before frost. Early spring plantings may bolt.

Yu Tsai Sum Matures in 40 (baby) to 60 (adult) days.

- ✓ Mild and sweet when cooked
- ✓ Grown for the tender flower bud stalks
- ✓ Cool crop

SKU: YUT-101 | **Seedlings:** \$4.75 (3 seedlings per pot)

Zucchini, Costata Romanesca

ORGANIC! The large, open, bushy heirloom plant produces distinctively ribbed Italian heirloom zucchini 30-40cm (12-16"). Fruit is long with pale green flecks and ribs on dark, grayish-green skin. Romanesco zucchini seeds produce fruits with a delightful nutty taste and a presence transcending the world of ordinary zucchini. Technically, Romanesco is a type of cocozelle squash, as it develops a bulbous end - zucchinis are traditionally evenly thick along their length. Some sources list this old variety as Costata Romanesca, or "ribbed Roman." Italy picks it up early at 15cm (6") long, with the flower still attached. The vines of this variety are a little longer than other summer squash.

Zucchini, Costata Romanesca Matures in 55 days.

SKU: ZUC-101 | **Seedlings:** \$4.75 (2 seedlings per pot)

Zucchini, Genovese (Organic)

CERTIFIED ORGANIC! A lovely variety of zucchini from Italy. The fruit is light green with no ribbing and tends to lighten out on the end. As with most Italian types, there is some variation in fruit appearance, but the flavour is consistently delicious. The taste and texture remain tender and delicious well beyond the "baby" stage, so you can miss picking for a few days and still have tasty zukes. Plants have a relatively large, open bush habit, which makes for easy picking—possibly the most productive summer squash. Skin is relatively thin (no need to peel!) and can blemish easily.

Zucchini, Genovese Organic Matures in 55 days.

- ✓ Italian variety
- ✓ Tender and delicious as a baby and mature fruit
- ✓ Very productive, and no need to peel

SKU: ZUC-102 | **Seedlings:** \$4.75 (2 seedlings per pot)

Zucchini, Goldini

Carol Deppe bred the Goldini Zucchini, in 2016, for its agronomic traits (earliness and vigour) and culinary use (whether prepared raw, cooked, or dried). Golden, slightly club-shaped fruit are good when eaten small, like a traditional market zuke, but flavour and texture peak when the fruit is larger. Therefore, picking fruit closer to 1-2 lbs is best.

One of the most exciting uses of this squash is for drying. Carol recommends slicing and drying the bigger 2-3 lb fruit for use throughout the year. Highly productive and gave harvestable fruit almost daily.

Zucchini, Goldini Organic Matures in 40-50 days.

- ✓ Bred for agronomic traits and culinary use
- ✓ Highly productive

SKU: ZUC-103 | **Seedlings:** \$4.75 (2 seedlings per pot)

Zucchini, Mutabile

CERTIFIED ORGANIC! A zucchini destined to be a favourite of home gardeners and small market farmers alike! Early, deep green fruit forms on sturdy bush plants that are resistant to powdery mildew. The real benefit of Mutabile is that it yields each week consistently, staying productive for the whole season. Plants have an open canopy with few spines. Powdery mildew resistance helps keep production and fruit quality high late into the season. Mutabile by Turtle Tree Seed in New York discovered this variety in Switzerland at Sativa Rheinau, a biodynamic seed company.

Zucchini, Mutabile Organic Matures in 50 days.

- ✓ Early, dark green
- ✓ Powdery mildew resistant
- ✓ Yield consistently

SKU: ZUC-104 | **Seedlings:** \$4.75 (2 seedlings per pot)

Zucchini, San Pasquale

A richly flavoured and productive zucchini from Southern Italy that easily beats watery hybrid zucchinis. Similar to Zucchino Striato di Napoli. The fruit is dark green with light green stripes and slight ridges. Produces many male flowers, which are great for stuffing or frying and the female flowers hold well enough to pick small fruit with flowers still attached. Good choice for the garden as San Pasquale is productive but not overwhelmingly. Yield is consistent all season long—original seed sourced from the Italian seed producer Emanuele Larosa Sementi.

Zucchini, Genovese Organic Matures in 55 days.

- ✓ Southern Italian variety
- ✓ Male flowers are great for stuffing or frying

SKU: ZUC-105 | **Seedlings:** \$4.75 (2 seedlings per pot)

Patisson Golden Marbre Scallop

CERTIFIED ORGANIC! Bright golden-Bright golden-yellow patty pan squash with a delightful nutty flavour. Young fruit is nice and tender, and larger fruit is firm and crunchy. Large bushy plants are productive, and the fruit still tastes excellent when picked overmature. The incredible thing about this summer squash is its ability to store off the plant. We had a few fruits on our counter for over a month, and they still cooked up perfectly delicious (we did have to scoop out a few seeds, though). Could this be a storage-type summer squash? Or is it a dual-purpose summer and winter squash? It would be good to sow in spring with the winter squash and again in mid-summer for a fall crop. A rare heritage French variety that makes us want to try many more French types.

Patisson Golden Marbre Scallop Organic Matures in 60 days.

SKU: ZUC-106 | **Seedlings:** \$4.75 (2 seedlings per pot)

Herbs

Ashwagandha

CERTIFIED ORGANIC! Ashwagandha is an evergreen shrub in the nightshade family that grows in India, the Middle East and Africa. It is a common treatment for stress and may aid in lowering blood pressure, relaxing the brain, reducing edema, and affecting the immune system. Ashwagandha prefers hot, full sun.

SKU: HER-201 | **Seedlings:** \$5.75 (1 seedlings per pot)

Basil, Genovese

CERTIFIED ORGANIC! Genovese Basil is a variety of sweet Basil that originated in Italy. Its vigorous, large leaves have a sweet, slightly spicy flavour. Genovese Basil produces bright green, lightly crinkled leaves that can grow up to 3 inches (8 cm.) long. Fresh or dried basil leaves are essential in many Italian, Greek, and Asian dishes. If Genovese basil plants go to flower, the flowers can be harvested and used in recipes that call for Basil. Pinch the growing tips and flowers to encourage branching and ensure larger harvests.

Basil, Genovese Organic Matures In 68 Days

- ✓ Excellent for use in containers
- ✓ Slow to bolt in extreme heat
- ✓ Prefer at least six hours of sunlight each day

SKU: HER-202 | **Seedlings:** \$4.75 (1 seedlings per pot)

Basil, Holy Basil (Perennials)

CERTIFIED ORGANIC! Tulsi/Sacred basil is one of the best herbs to grow for tea. It smells like paradise in a teacup and garden when you walk by. When it's flowering, all of the little pollinators love Holy Basil. The flavour is a little fruity with an accent of clove and vanilla, making it seem slightly sweet. Many types of Holy Basil have been used for centuries in Ayurvedic medicine as an anti-inflammatory and helping to alleviate stress. This strain is more cool-weather tolerant and productive. It produces lots of healing and delicious aromatics. It has a similar flavour to traditional South Asian tulsi with some added fruity and vanilla notes. Richo Cech of Strictly Medicinal Seeds has confirmed that it contains the essential medicinal compounds Eugenol and Rosmarinic Acid. From seed to harvest, Basil is ready in as few as 45 days. Basil can grow in full sun, 6 hours of sun.

Basil, Holy Basil Matures In 45 Days

- ✓ Cool-weather tolerant

SKU: HER-203 | **Seedlings:** \$4.75 (1 seedlings per pot)

Basil, Lime

CERTIFIED ORGANIC! This heavenly herb originated in Africa and can't handle life outdoors until the evenings are warm. Lime basil says it in the name; its long, bright green leaves have a strong citrus aroma and flavour, and it is similar in growth to Genovese Basil. A tropical combination of zesty lime and sweet Basil, Lime Basil is loved by innovative cooks who add its mild flavour to grilled fish, seafood, salad, pasta, garden salads and poultry dishes. It is also a lovely addition to marinades, vinegar or jellies. Perfumed, 2", light green leaves grow on compact, mounding plants that grow to about 12" tall.

Basil, Lime Organic Matures In 60-70 Days

SKU: HER-204 | **Seedlings:** \$4.75 (1 seedlings per pot)

Basil, Purple, Dark Opal

CERTIFIED ORGANIC! Purple basil plants are unusual and attractive in indoor and outdoor herb garden containers. Some purple basil plants, such as Dark Opal purple basil, are intensely aromatic. Pink flowers add to the beauty of the dark purple, almost black leaves. Growing a little more slowly than many other basil plants, the blooms of this plant appear in mid to late summer. Keep flowers pinched back while using the leaves for culinary or medicinal purposes. Harvest often to encourage growth and a more attractive Dark Opal basil plant. When you're ready for blooms on the plant, please stop using the leaves, as they may become bitter during flowering.

Basil, Purple Dark Opal Matures In 60 Days

SKU: HER-205 | **Seedlings:** \$4.75 (1 seedlings per pot)

Basil, Spicy Globe Greek

CERTIFIED ORGANIC! Spicy Globe basil plants are short, have very fragrant flavour and are compact, reaching only 6 to 12 inches (15-30 cm.) in most gardens. Their attractive round shape makes a great addition to the sunny flower bed or herb garden. The flavour of the basil 'Spicy Globe' herb is different from most basil, adding a spicy kick to pasta dishes and pestos. It is easy to grow, and regular harvesting encourages more growth. Toss directly into salads and dressings. Sprinkle on fish, potatoes, or any other veggie you choose; make great pesto too.

Basil, Spicy Globe Greek Organic Matures In 70 days.

- ✓ A perennial plant
- ✓ Best when used fresh

SKU: HER-206 | **Seedlings:** \$4.75 (1 seedlings per pot)

Basil, Sweet Thai Asian

CERTIFIED ORGANIC! Thai Basil is a member of the mint family and has a lovely flavour reminiscent of anise, licorice, and clove. Popular among Thailand, Vietnam, Laos, and Cambodia cuisines, growing Thai Basil has a pleasing aroma similar to sweet Basil and is generally used fresh in recipes. Also referred to as 'Sweet Thai,' Thai Basil plants grow to a height of between 12 to 18 inches (30.5-45.5 cm.) with leaves 1 to 2 inches (2.5 to 5 cm.) long on purple stems with purple flowers. Like sweet Basil, Thai Basil is a perennial. Rosemary and Thai basil work well planted together, enjoying similar well-drained soil, water, and fertilization. Sun is a crucial ingredient. Thai basil plants need at least six hours of direct sunlight to flourish. Harvest the leaves in the morning when their essential oils are at their peak, and the flavour of the growing Thai Basil will be at a premium. Also, water the Thai Basil before harvest to intensify the flavour.

Basil, Sweet Thai Asian Organic Matures In 63 Days

SKU: HER-207 | **Seedlings:** \$4.75 (1 seedlings per pot)

Catnip (Perennials)

CERTIFIED ORGANIC! These fast-growing perennials thrive with plenty of sunlight. Catnip (*Nepeta cataria*) is a herbaceous perennial that thrives in much of North America and is very easy to grow. It has a clump-forming growth habit with square stems and triangular to oval, gray-green leaves with toothed edges that stretch around 3 inches long. Flower spikes appear in the late spring to early fall, bearing clusters of tiny blooms that are white with light purple markings.

The catnip plant will reach its mature size in a single season; it is a fast and aggressive grower and can quickly spread throughout the landscape if not kept in check. It is considered invasive in some spots in the United States.

Catnip, Organic Matures In 85 Days

SKU: HER-208 | **Seedlings:** \$4.75 (1 seedlings per pot)

Chives, Garlic (Perennials)

CERTIFIED ORGANIC! Garlic chives look similar to common chives but taste more like—you guessed it—garlic. Native to southeastern Asia, other common names for garlic chives include Chinese chives and Chinese leek. This perennial, clump-forming herb is a member of the onion family. Unlike onions and different types of garlic, the fibrous bulbs of garlic chives are not edible. Instead, all parts of the plant emit a robust and oniony scent when cut or crushed, while the flower scent resembles violets. Grown for its edible leaves and flowers, the gray-green leaves grow up to 12 inches long, and flowers bloom on sturdy stems just above the foliage. Unlike the hollow onion chive leaves, the leaves of garlic chives are flat and grow like grass. Attracting butterflies, the tiny, star-shaped, creamy white flowers bloom with striped tepals in loose clusters from late summer through fall. Mature plants can reach up to 3 feet tall and easily grow.

Chives, Garlic Matures In 80-90 Days

SKU: HER-209 | **Seedlings:** \$4.75 (1 seedlings per pot)

Cilantro, Calypso

CERTIFIED ORGANIC! While other types of cilantro have sent up their tall flower stalks and set seed, Calypso cilantro remains bushy and productive. This compact, low-growing variety comes from a British breeding program, and it's the slowest to bolt in side-by-side trials — resisting the urge to bolt by as many as three weeks. Its fragrance adds a distinctive flavour to broths, tacos, and countless other meals. Its low growing point allows it to regrow after multiple cuts for an extended harvest.

Cilantro, Calypso Matures In 50 Days

- ✓ Slowest bolting variety
- ✓ Multiple harvests, Repeat sowings
- ✓ Excellent flavour

SKU: HER-210 | **Seedlings:** \$4.75 (1 seedlings per pot)

Dill, Hera

CERTIFIED ORGANIC! Hera Dill is a highly productive variety. Plant height averages 61 cm (24"), producing feathery blue-green foliage on short stalks with exceptional aroma and flavour. Good disease resistance. It is a later bolting variety, about two weeks later than Bouquet Dill, and provides a tremendous beneficial-insect habitat in the garden and can reseed prolifically. Hera Dill is used in many pickling recipes, including seafood, soups, sauces, and potatoes. However, Dill tends to bolt if transplanted, so it is best to direct sow.

Dill, Hera Matures In 55-70 Days

- ✓ Best left alone once established
- ✓ A later bolting variety

SKU: HER-211 | **Seedlings:** \$4.75 (1 seedlings per pot)

Dill, Ambrosia

CERTIFIED ORGANIC! Popular Polish variety is grown for fresh use, dill pickles, and frozen and dried production; heavenly in the garden and an essential ingredient for many pickle recipes. Early to mature and slow to bolt, its harvest season is significantly longer than other varieties. Thanks to its dense lateral branching habit, fresh leaf yields are heavy. Striking intense colour, fragrance and flavour. Good resistance to disease, drought and cold. An amazingly fragrant variety of dill. Also delicious in borscht (beet soup) and cooked with fish or potatoes. Flowers are beautiful to pollinators.

Dill, Ambrosia Matures In 35 Days

- ✓ Resistance to disease, drought and cold
- ✓ Attract pollinators

SKU: HER-212 | **Seedlings:** \$4.75 (1 Seedling per pot)

Jamaican Sorrel (Hibiscus)

CERTIFIED ORGANIC! Jamaican Sorrel, or Roselle, is a species of flowering plant from the Hibiscus family native to Africa. Before reaching Asia and the West Indies, it was mainly present in West Africa in the 16th to early 17th century. Today, the gorgeous red plant, primarily known as the Jamaican Sorrel, named after its edible leaves, is a short-lived perennial growing up to 7 feet tall; the flowers bloom in late fall through early winter. Sorrel is a sweet, gingery, wine-hued Jamaican drink that's always been a part of my Christmas tradition, offered as an option alongside eggnog and rum punch at holiday parties and tree trimmings. Its seasonal popularity is due to the time of year; its primary ingredient, the blossoms of the hibiscus plant, were harvested initially and cultivated in the Caribbean. These days, sorrel is available for purchase—as processed or whole dried blossoms, or even steeped and bottled—at all times of the year. It contains antioxidants and nutrients like fibre, vitamin C, and magnesium.

SKU: HER213 | **Seedlings:** \$4.75 (2 Seedling per pot)

Lavender, Ellagance Purple

ORGANIC! Lavender is a low-growing shrub native to the Mediterranean region. The fragrant flowers and foliage make it a favourite for herb gardens and the perennial border. It will also grow fine in tubs or containers, but the plants may need winter shelter in colder regions. The 'Ellagance' Series of Lavender is compact and flowers the first year. This selection produces grey-green leaves with spikes of deep violet-blue flowers. Prune lightly in early spring, no harder than 4 inches. Lavender MUST have good drainage to avoid root rot problems. Consider growing in a raised bed or rock garden. A seed-grown selection introduced by Kieft Seeds of the Netherlands. Winner of a European Fleuroselect Gold Medal (2006)

Lavender, Ellagance Purple

SKU: HER214 | **Seedlings:** \$4.75 (1 Seedling per pot)

Lavender, Munstead

ORGANIC! Munstead lavender is a popular cultivar of the most widely-grown lavender species, English lavender (*Lavandula angustifolia*). Munstead lavender is compact and grows slowly, and fits in containers. The plant is characterized by its narrow gray-green foliage that mounds in a dense and aromatic woody perennial. Delicate purple flowers surround the spiky stem tips in summer. It blooms earlier than other English lavenders and, unlike French lavender, is cold hardy. This means it can also be grown in climates where the thermometer falls below 32 degrees Fahrenheit. Its sweet scent makes it one of the best lavenders for potpourris, sachets, and cooking. Dried sprigs can be used for wreath-making and other crafts. Keep in mind, however, that Munstead lavender is toxic to cats, dogs, and horses.

Lavender, Munstead Blooms During the Spring and Summer

SKU: HER215 | **Seedlings:** \$4.75 (1 seedling per pot)

Moringa

CERTIFIED ORGANIC! Moringa is a plant native to India and Nepal; it's known as the "miracle tree" and "tree of life." Today it's also grown in Asia, Latin America, West East and South Africa, the Caribbean, Florida and the Pacific Islands. For centuries, folks in India, Africa and the Caribbean have used this plant's roots, leaves, flowers, and seeds for food and medicine. Moringa has many essential vitamins and minerals. The leaves have seven times more vitamin C than oranges and 15 times more potassium than bananas. It also has calcium, protein, iron, and amino acids. Moringa powder, made from moringa tree leaves, has several science-backed benefits and medicinal uses. This superfood has been used as a traditional remedy in phytomedicine and ayurvedic healing for thousands of years. Moringa leaves stick out as a superfood because one cup of chopped leaves is considered a good source of iron, calcium, vitamin C, vitamin B6, and riboflavin and has notable amounts of potassium, vitamin A, vitamin E, and magnesium.

SKU: HER216 | **Seedlings:** \$5.75 (1 Seedling per pot)

Marjoram, Sweet

CERTIFIED ORGANIC! Marjoram is a unique herb popular in many Mediterranean dishes. It has long been used as an herbal medicine and contains several compounds that may offer health benefits. Marjoram, also known as sweet marjoram, is an aromatic herb in the mint family grown in the Mediterranean, North Africa, and Western Asia for thousands of years. While similar to Oregano, it has a milder flavour and is often used to garnish salads, soups, and meat dishes.

Oregano, Greek

CERTIFIED ORGANIC! Greek Oregano offers the best, most pungently flavoured Oregano leaves for cooking. Plants are hardy when established and impart a wonderful wild mountain aroma in the garden with their tiny white or pink flowers. Bees adore Oregano when it is in bloom. Oregano is one of the best herbs for drying because it maintains a strong flavour for months after harvest. Pick and dry whole stalks or plants - hang them upside down in an airy place out of direct sunlight. Once the plants are dehydrated, store them in open plastic bags. Otherwise, pull off the leaves and store them in sealed jars—Greek oregano pairs brilliantly with meats, eggs, and roasted vegetables like zucchini and eggplant.

Oregano, Greek Matures In 80 Days

- ✓ Best leaves for cooking
- ✓ Attracts pollinators

SKU: HER228 | **Seedlings:** \$5.75 (1 Seedling per pot)

Parsley, Curly

CERTIFIED ORGANIC! The plants have short, strong stems that support significant clusters of highly curled, dark-green leaves. The flavour is distinctly savoury without being bitter. Parsley adds a subtle but critical flavour to a host of Mediterranean dishes. It is widely used in companion planting because its strong scent repels insects like the Asparagus Beetle. Parsley likes asparagus, carrots, chives, corn, onions, and tomatoes. The leaves can be sprinkled on asparagus to repel asparagus beetles and around roses to improve their scent. Let some of your parsley bloom to attract hoverflies and predatory wasps. Parsley is a biennial plant that forms a long (edible) tap root. Choose deep pots for container growing.

Parsley, Curl Matures in 80 days.

- ✓ Non-bitter flavour
- ✓ Attracts beneficial insects
- ✓ Open-pollinated

Stevia

CERTIFIED ORGANIC! Stevia is a plant that is a member of the chrysanthemum family. Centuries ago, Natives of Paraguay used the leaves of this small, herbaceous, semi-bushy, perennial shrub to sweeten their bitter drinks. It is a small seasonal plant native to Brazil and Paraguay, which grows to 30–60 centimetres (1–2 feet); the flowers are typically trimmed to improve the taste of the leaves. Stevia is widely grown for its leaves, from which extracts can be used as sweeteners. Stevia products in grocery stores don't contain whole stevia leaf. Instead, use Stevia extracts in cooked/baked goods or beverages. In the Pacific Rim countries, stevia is regularly used to prepare food and pharmaceutical products.

SKU: HER234 | **Seedlings:** \$5.75 (1 Seedling per pot)

Sage, Broadleaved

CERTIFIED ORGANIC! Broadleaf Sage is a perennial herb that is a popular addition to many meat, egg and cheese dishes. Sage works great to flavour savoury foods like sausage, dressing or stuffing and homemade cheese. Sage plants average 20" tall but can get as large as 3 feet. Plants produce stalks of gray to green leaves with purple flowers. Sage leaves may be used fresh or allowed to dry. Dried herbs will typically have a more concentrated flavour than fresh ones.

Sage, Broadleaved, is Mature 80 Days after transplanting.

SKU: HER235 | **Seedlings:** \$5.75 (1 Seedling per pot)

Fruits

Ground Cherries

ORGANIC! Ground cherries are not very well known, but they are easy to grow in the garden with minimal pest and disease problems. Their small, yellow-orange fruits have a sweet-tart flavour similar to pineapple with a faint background flavour of tomato. Ground cherries are part of the same plant family, Solanaceae, as tomatoes and aren't related to actual cherries. Instead, ground cherry plants look like small, sprawling shrubs with bright green leaves with toothed edges. They sport yellow flowers in the summer before bearing fruit in the late summer to early fall wrapped in a papery husk, much like their relative tomatillos. Plant ground cherries in the spring. As annuals, they have a fast growth rate and complete their life cycle in one season. Before planting, note that all parts of ground cherry plants except the fruit are toxic to people and pets.

Garden Huckleberry Bear Fruits in 70 Days

SKU: FRU401 | **Seedlings:** \$4.75 (2 Seedling per pot)

Garden Huckleberry

ORGANIC! Garden Huckleberry is native to Africa and is not a true huckleberry nor a ground cherry. Garden Huckleberry seeds are started indoors around the same time as tomato seeds and transplanted outside at the same time as your tomato seedlings. The small, 1 cm (1/2") fruits begin to set early, turning from bright green to jet black. Best used as a fruit for cooking and sweetening, with a flavour reminiscent of blueberries and Concorde grapes. Garden Huckleberry is a nightshade family member who like tomatoes and eggplants, should not be eaten unripe. Also, do not eat fruits with green skin showing, as they are slightly toxic. The tiny seeds are easy to save for planting the following year.

Garden Huckleberry Bear Fruits in 80 Days

SKU: FRU402 | **Seedlings:** \$4.75 (2 Seedling per pot)

Melon, Heart of Gold

ORGANIC HYBRID! Heart of Gold is an aromatic, sweet, deep orange-fleshed melon. Expect the round fruit to range from 12.5 cm to 16.5 cm (5-7") in diameter with a small seed cavity. The rind is green with a heavily netted grey outer skin. Melons average 1.5 kg (3.3 lbs) weight at harvest. Heart of Gold is another heirloom grown for over 100 years.

Melon, Heart of Gold Bear Fruits in 80 and 90 Days.

SKU: FRU403 | **Seedlings:** \$4.75 (2 Seedling per pot)

Melon, Tirreno

Organic Grow this wonderful Tuscan cantaloupe in a poly-tunnel or under a cloche and be rewarded with 1.7kg (60 oz), heavily netted, sweetly fleshed fruits. The extra heat a cloche provides will make the plants far more productive, but they will also produce in a regularly raised garden bed. The even, dark green sutures on Tirreno melons develop a yellow tinge at peak ripeness, telling you exactly when to harvest. The flesh is rich orange with a crisp texture and excellent sweet flavour with a brix rating of 13-15%.

Melon, Tirreno Organic Bear Fruits in 80 Days. (Hybrid seeds)

- ✓ Sutures develop a yellow tinge when ripe
- ✓ 1.7kg heavily netted, sweet fruits
- ✓ Grow in a poly-tunnel or under a cloche

SKU: FRU404 | **Seedlings:** \$4.75 (2 Seedling per pot)

Melon, Charentais Organic

ORGANIC! A famous superb heirloom French melon--super sweet and very fragrant. It is a small variety of melon, around the size of a softball. It has flesh similar to most cantaloupes but with a distinct and more intense aroma and a pinker hue. It originated in the Charentes region of France and is most associated with the Provençal area around Cavaillon. Most true Charentais melons are grown in and around this region and are almost exclusively available in France.

SKU: FRU405 | **Seedlings:** \$4.75 (2 Seedling per pot)

Watermelon, Sugar Baby

CERTIFIED ORGANIC! Sugar Baby Organic watermelon is a classic heirloom icebox-type melon that first appeared in 1959. Sugar Baby melons produce watermelons with a thin, hard rind with distinct stripes. The flesh is firm, sweet, almost orange-red, with tiny, apple-like seeds. The fruits grow 18cm (7") in diameter on vines that can be grown along the ground or up a trellis. Provide as much heat as possible for Sugar Baby melon's best productivity by growing under a cloche, in a greenhouse, or raised beds. Be sure to use very fertile soil and provide even moisture through the growing season.

Watermelon, Sugar Baby Bear Fruits in 82 Days.

- ✓ Firm, sweet, orange-red flesh
- ✓ Round fruits grow to 18cm (7")
- ✓ Heirlooms dating back to 1959

SKU: FRU406 | **Seedlings:** \$4.75 (2 Seedling per pot)

Watermelon, Blacktail Mountain

ORGANIC! Blacktail Mountain Watermelon is one of the earliest watermelons known; it is superb for the North but also grows well in heat and drought. The flesh is red and deliciously sweet. The fruit has a dark rind and weighs 8-12 lbs each. Our friend Glenn Drowns, owner of the Sand Hill Preservation Center in Iowa, developed this excellent variety. A favourite of many gardeners across the USA. One of the best we have ever tried!

SKU: FRU408 | **Seedlings:** \$4.75 (2 Seedling per pot)

Edible Flowers

Calendula, Flashback

CERTIFIED ORGANIC! Flowers are orange, apricot, peachy, vanilla or yellow with flashy red or maroon backs. There is a high percentage of bicolours and double and semi-double blooms. Excellent for cutting and edible too. As the flowers fold up for the night, they reveal their flashy backsides, hence the name. This is a real show-stopper in the garden. It is early to bloom and produces another flush of heavy bloom in the fall till frost comes.

Calendula, Flashback Blooms In 50-55 days

SKU: EFL301 | **Seedlings:** \$4.75 (Several seedlings per pot)

Pansy, Back to Black

CERTIFIED ORGANIC! This petite pansy blooms in the first year over a long period. Just 14 to 16 weeks after seeding, its small, very dark, flat-faced flowers began appearing. With regular deadheading Back to Black just blooms and blooms. The foliar growth is vigorous, but the stature of the plants remains compact at about 15cm (6") tall. It would look great in containers or window boxes but looks terrific in mass plantings. The flowers are intense purple but so deep that they appear black from a few feet away. Each delicate flower is streaked in the centre by a brush of golden yellow. The edible flower petals look amazing, scattered on ice cream. Sow in early spring for summer flowers or as late as July for winter blooms.

Pansy, Back to Black Blooms In 85 Days

SKU: EFL302 | **Seedlings:** \$4.65 (3 seedlings per pot)

Pansy, Fizzy Fruit Salad

CERTIFIED ORGANIC! This spreading hybrid pansy has exceptional overwintering ability. Ruffled petals in various colours bring a dramatic splash of vibrancy to the winter garden. Sow Fizzy Fruit Salad Mix Viola seeds in July and August for blooms from October to the following May. They look incredible in containers and hanging baskets and particularly spectacular in mass bedding plantings. The broad pansy faces, fancy frilled petals, and dazzling colours bring an extraordinary look to any garden. Much needed colour for an otherwise subdued winter palette. Be sure to plant your winter flowering pansies the previous summer.

SKU: EFL306 | **Seedlings:** \$4.65 (3 seedlings per pot)

Pansy, Brush Strokes

CERTIFIED ORGANIC! Annual. A stunning re-selection of the striped pansies and violas of yesteryear, these vibrant beauties have disappeared, so we are excited to bring back this colour scheme to the garden again. So appropriately named, the petals look like a painting, each blooming with unique markings. This pansy loves cool weather, and the flowers are edible and delicious, perfect for salads, desserts, garnishes, and more! The blooms are striking and will make a statement in pots, borders, and beds.

SKU: EFL308 | **Seedlings:** \$4.65 (3 seedlings per pot)

Pansy, Antique Laeta

CERTIFIED ORGANIC! These dainty, dime-sized blooms are adorable. The petals are coloured like fresh-churned spring butter with a dollop of jammy plum at each center. Plants average 3-4 inches tall by 4-6 inches wide. These one-of-a-kind dwarf violas look super sweet, peeking out of tiny pots tucked into the fairy garden or planted in borders, beds, or window boxes. The blooms are edible, topping baked goods with a perfect touch of elegance.

SKU: EFL309 | **Seedlings:** \$4.65 (3 seedlings per pot)

Nasturtium, Empress of India

CERTIFIED ORGANIC! This old heirloom variety has stunning crimson flowers that rise above cascading, deep green leaves for hanging baskets or planters. Empress of India's nasturtium seeds produce flowers that make a striking contrast that never fails to attract attention. This variety matures to heights of 30cm (12"). Nasturtiums are reasonably tough plants and quite drought-tolerant. The edible flowers produced by this nasturtium are so intensely bright red that they look amazing in salads. Save some of the fresh seeds produced by your nasturtiums for pickling. They make excellent capers. Try planting some seeds as microgreens for their powerful, peppery kick.

Nasturtium, Empress of India, Blooms In 55-65 Days

SKU: EFL310 | **Seedlings:** \$4.65 (3 seedlings per pot)

Nasturtium, Alaska Mix

CERTIFIED ORGANIC! Nasturtiums are one of the most multi-functional plants you can grow. They are ideal for every survival food and medicinal garden; you can eat the ENTIRE plant! The leaves have a slightly warm peppery flavour similar to watercress and rocket. The flowers are milder with sweet nectar. The seeds, though hot and fragrant, are edible too. A warning: never eat any flower or plant treated with pesticides or other chemicals! Start with organic seeds. The leaves are high in vitamin C (supports a strong immune system), iron and other minerals. The flowers are plentiful in vitamins B1, B2, B3 and C and contain manganese, iron, phosphorus, phosphorus, and calcium.
